

Build a SNOW GLOBE

CRAFT

HOW TO USE:

This coloring craft makes it quick and easy for students to create their own snow globes! Each student will need a coloring page of snow globe decorations (choose winter or Christmas page). However, there are many variations to this craft so here are a few suggestions:

1.) Students choose a globe template from the versions included (these are full-page templates). Student can color the decorations and glue them on the template.

2.) Give each student a decoration page and a paper plate. Instead of using a premade globe template, have students glue decorations on the plate to create a snow globe scene. Give students one of the base sections to glue at the bottom of the plate.

****SUGGESTIONS****

1.) Print the globe templates on white cardstock so they can support the glue and decorations better. The decoration page can be printed on regular paper.

2.) Have students color the decorations BEFORE they cut them out. It is easier for them to hold on to while coloring.

3.) Have students color the globe template (if you are using one) BEFORE gluing any decorations on it. On the blank globe students can draw the line for the ground if they want to fit more characters in the globe.

4.) Use finished snow globes as "toppers" for students' written responses. Pair with the writing paper included.

5.) Use a small empty milk carton to make the snow globes stand up. Make sure the templates are copied on cardstock and glue the milk carton in the middle of the back.

6.) Need a faster option? Have students draw and decorate directly on the snow globe templates instead of cutting out pieces.

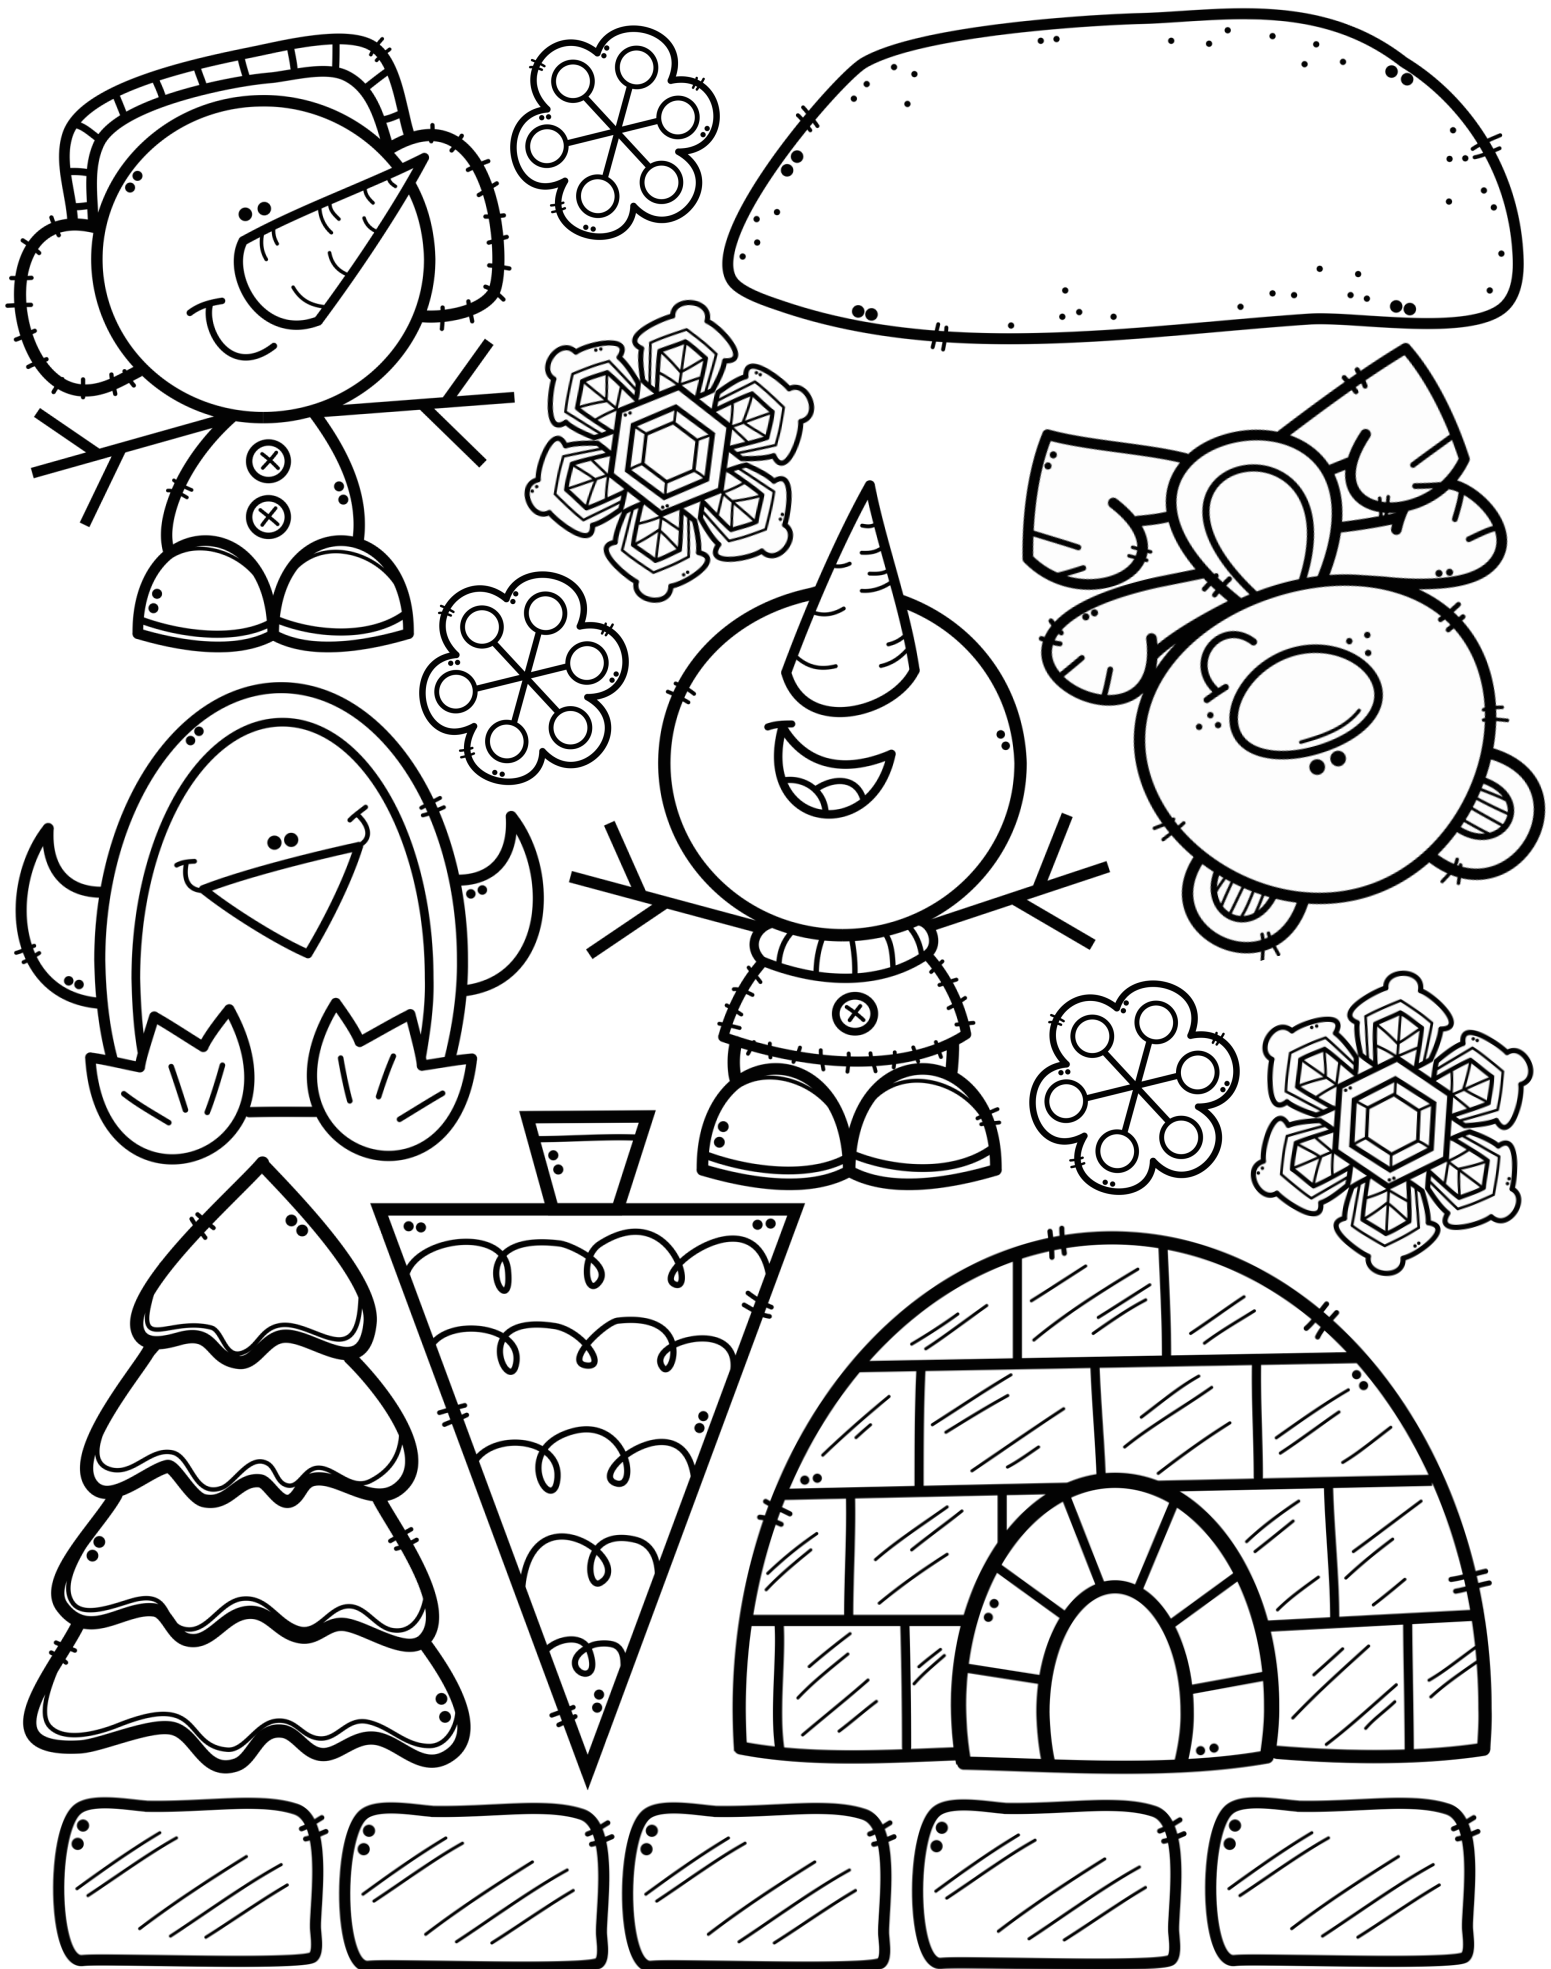

EXAMPLES:

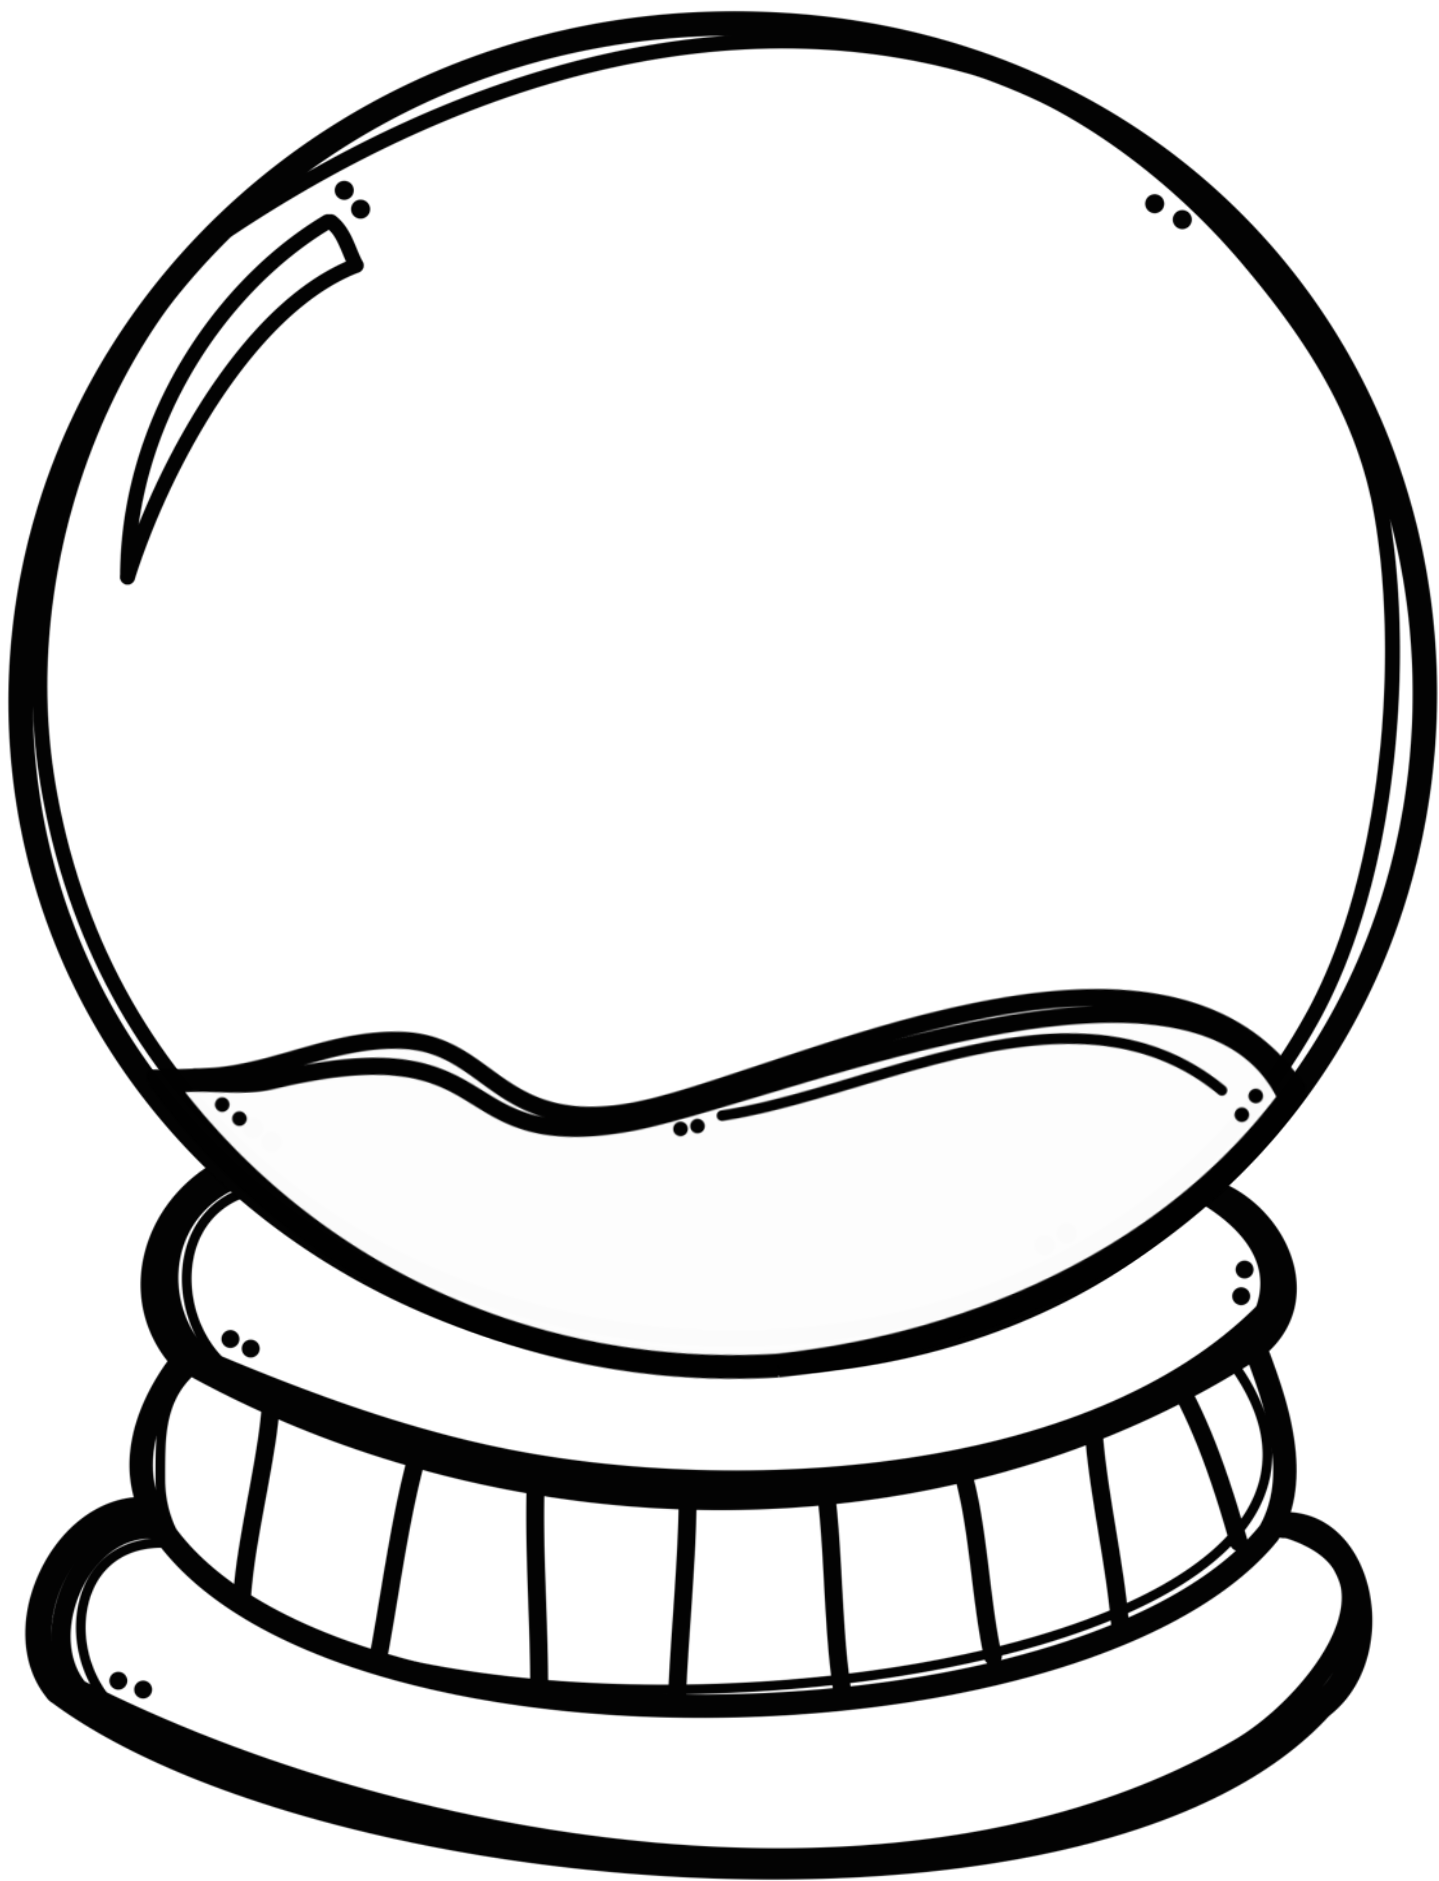

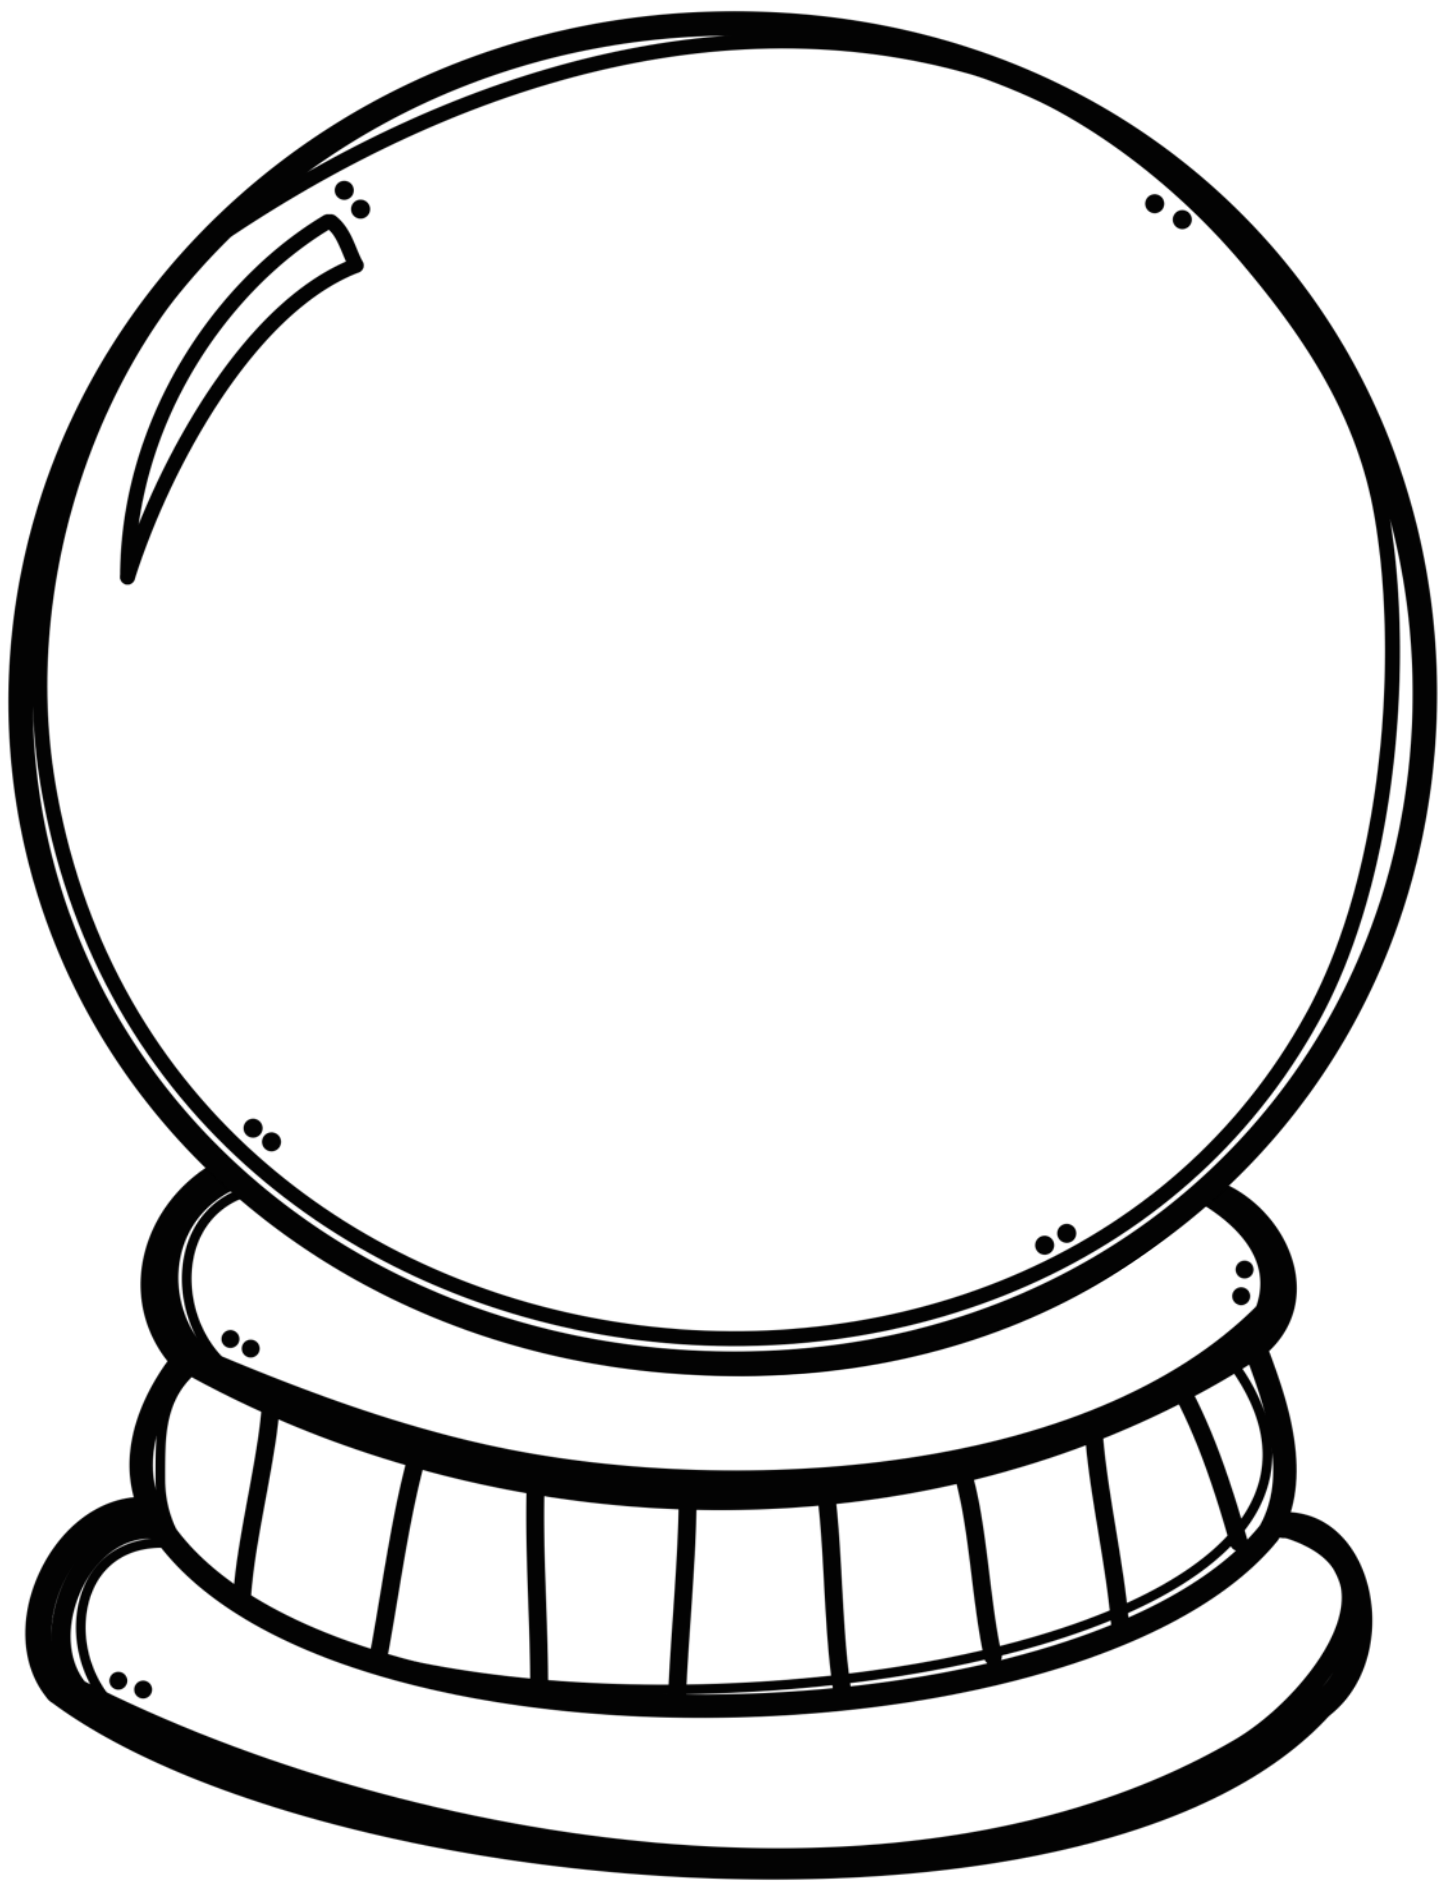

Here are a few examples of the template craft. I would suggest crayons or colored pencils over markers because they tend to make the small pieces harder to glue and colors might bleed.

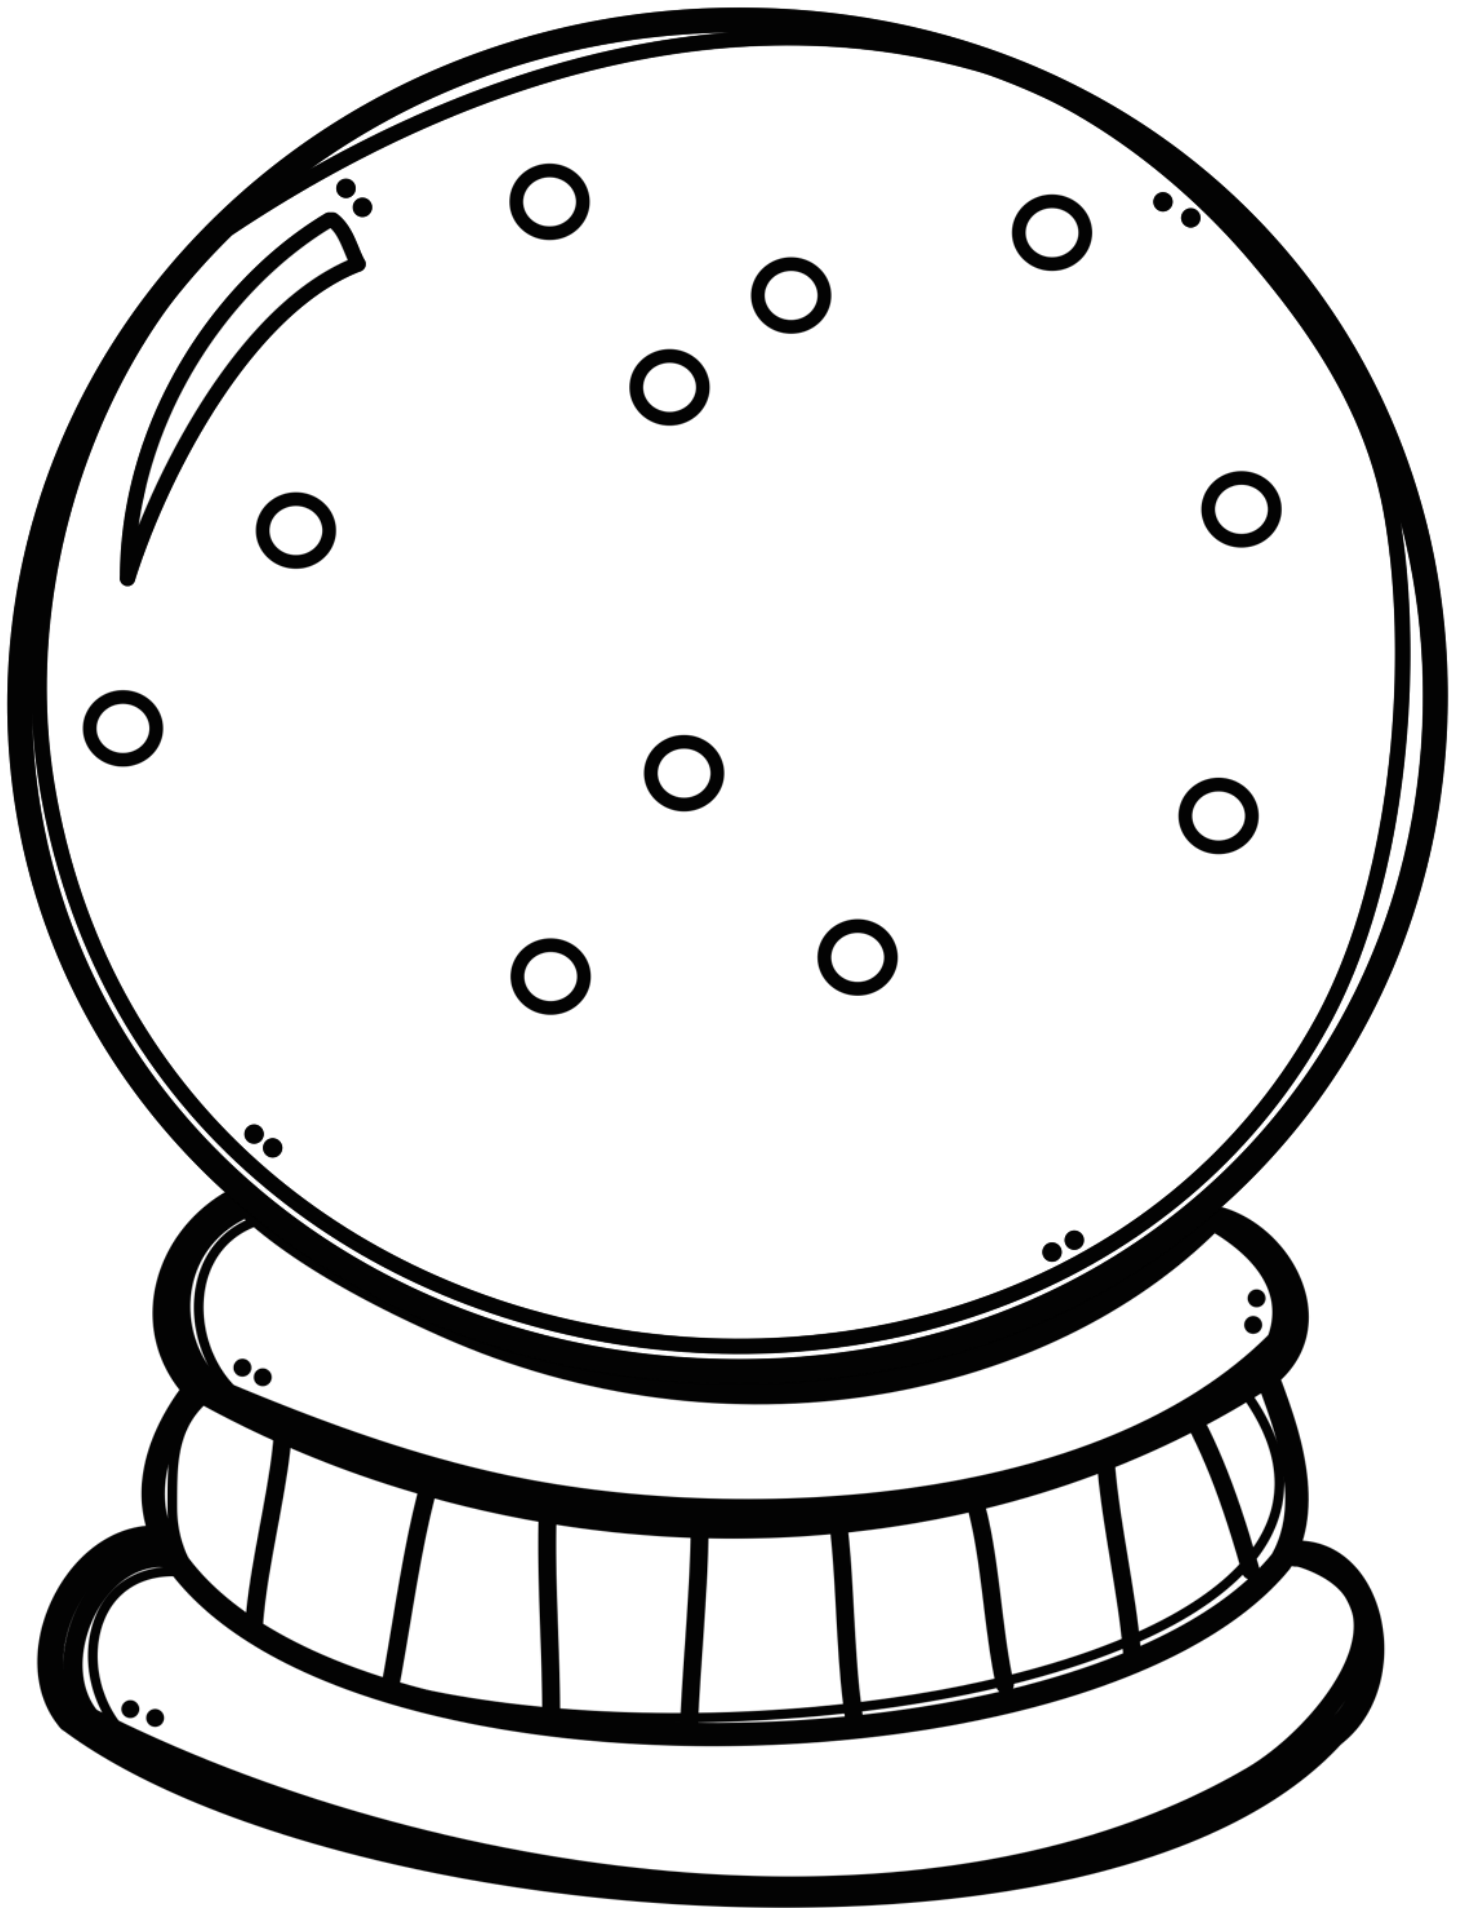

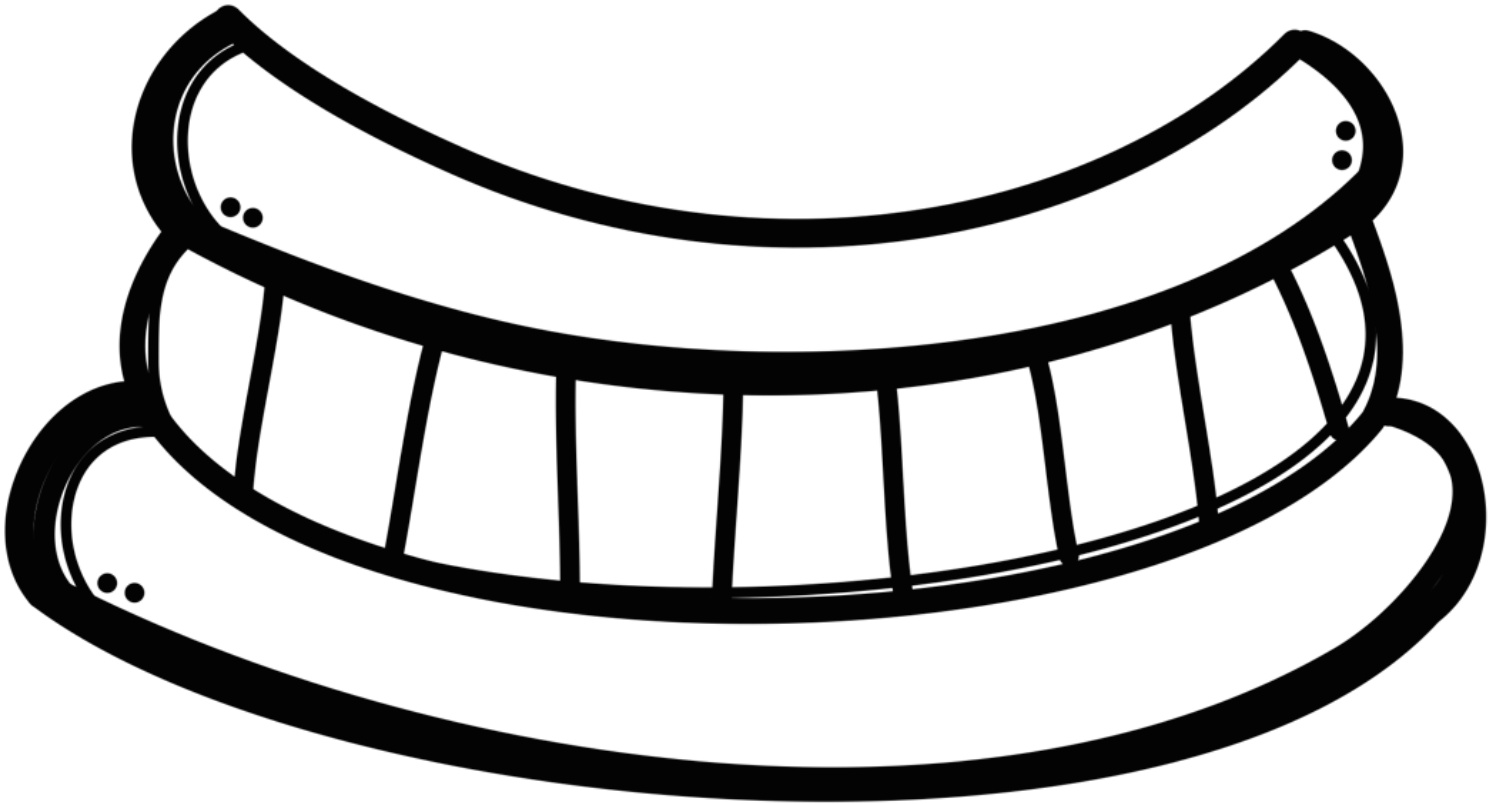

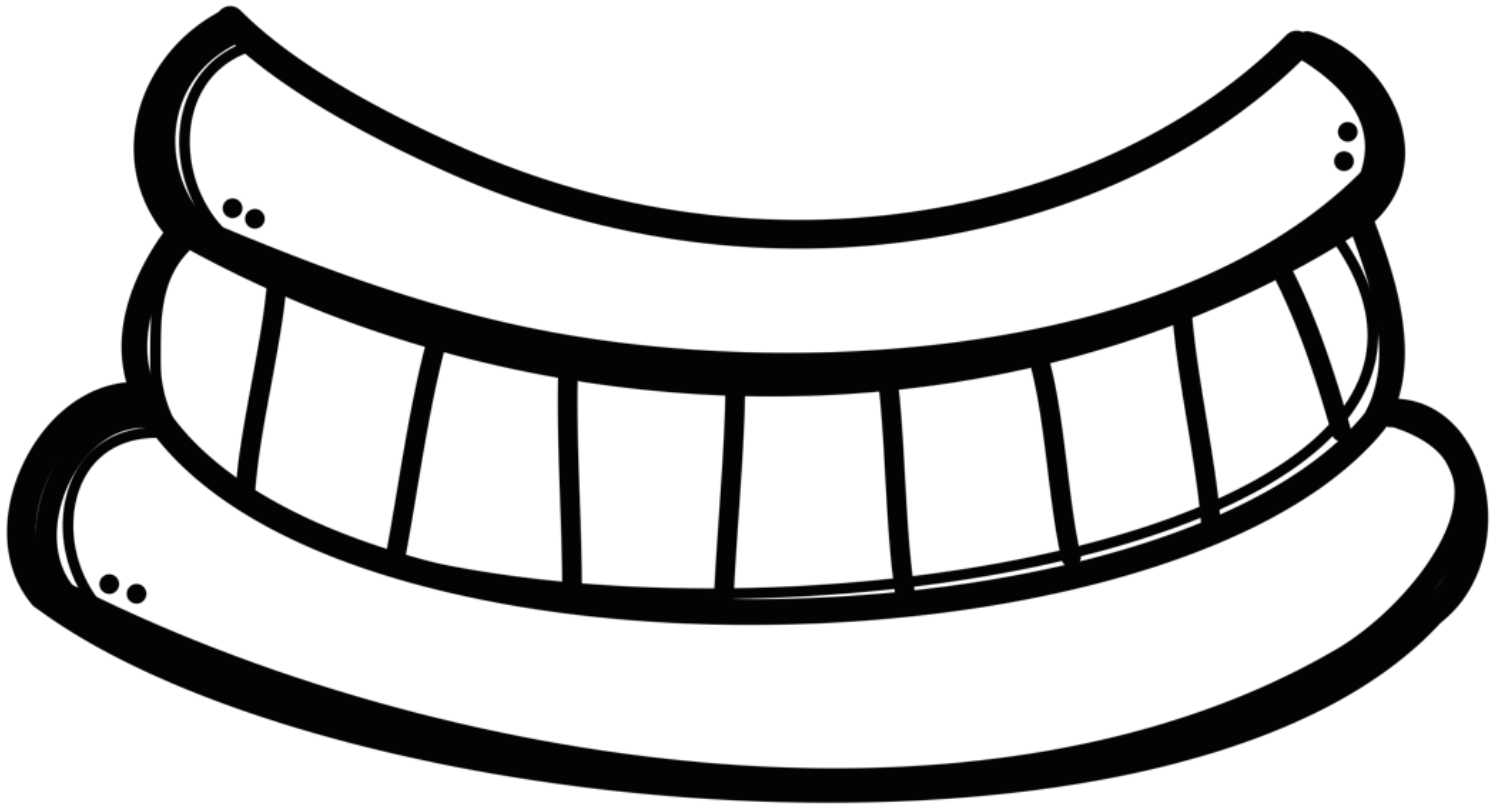

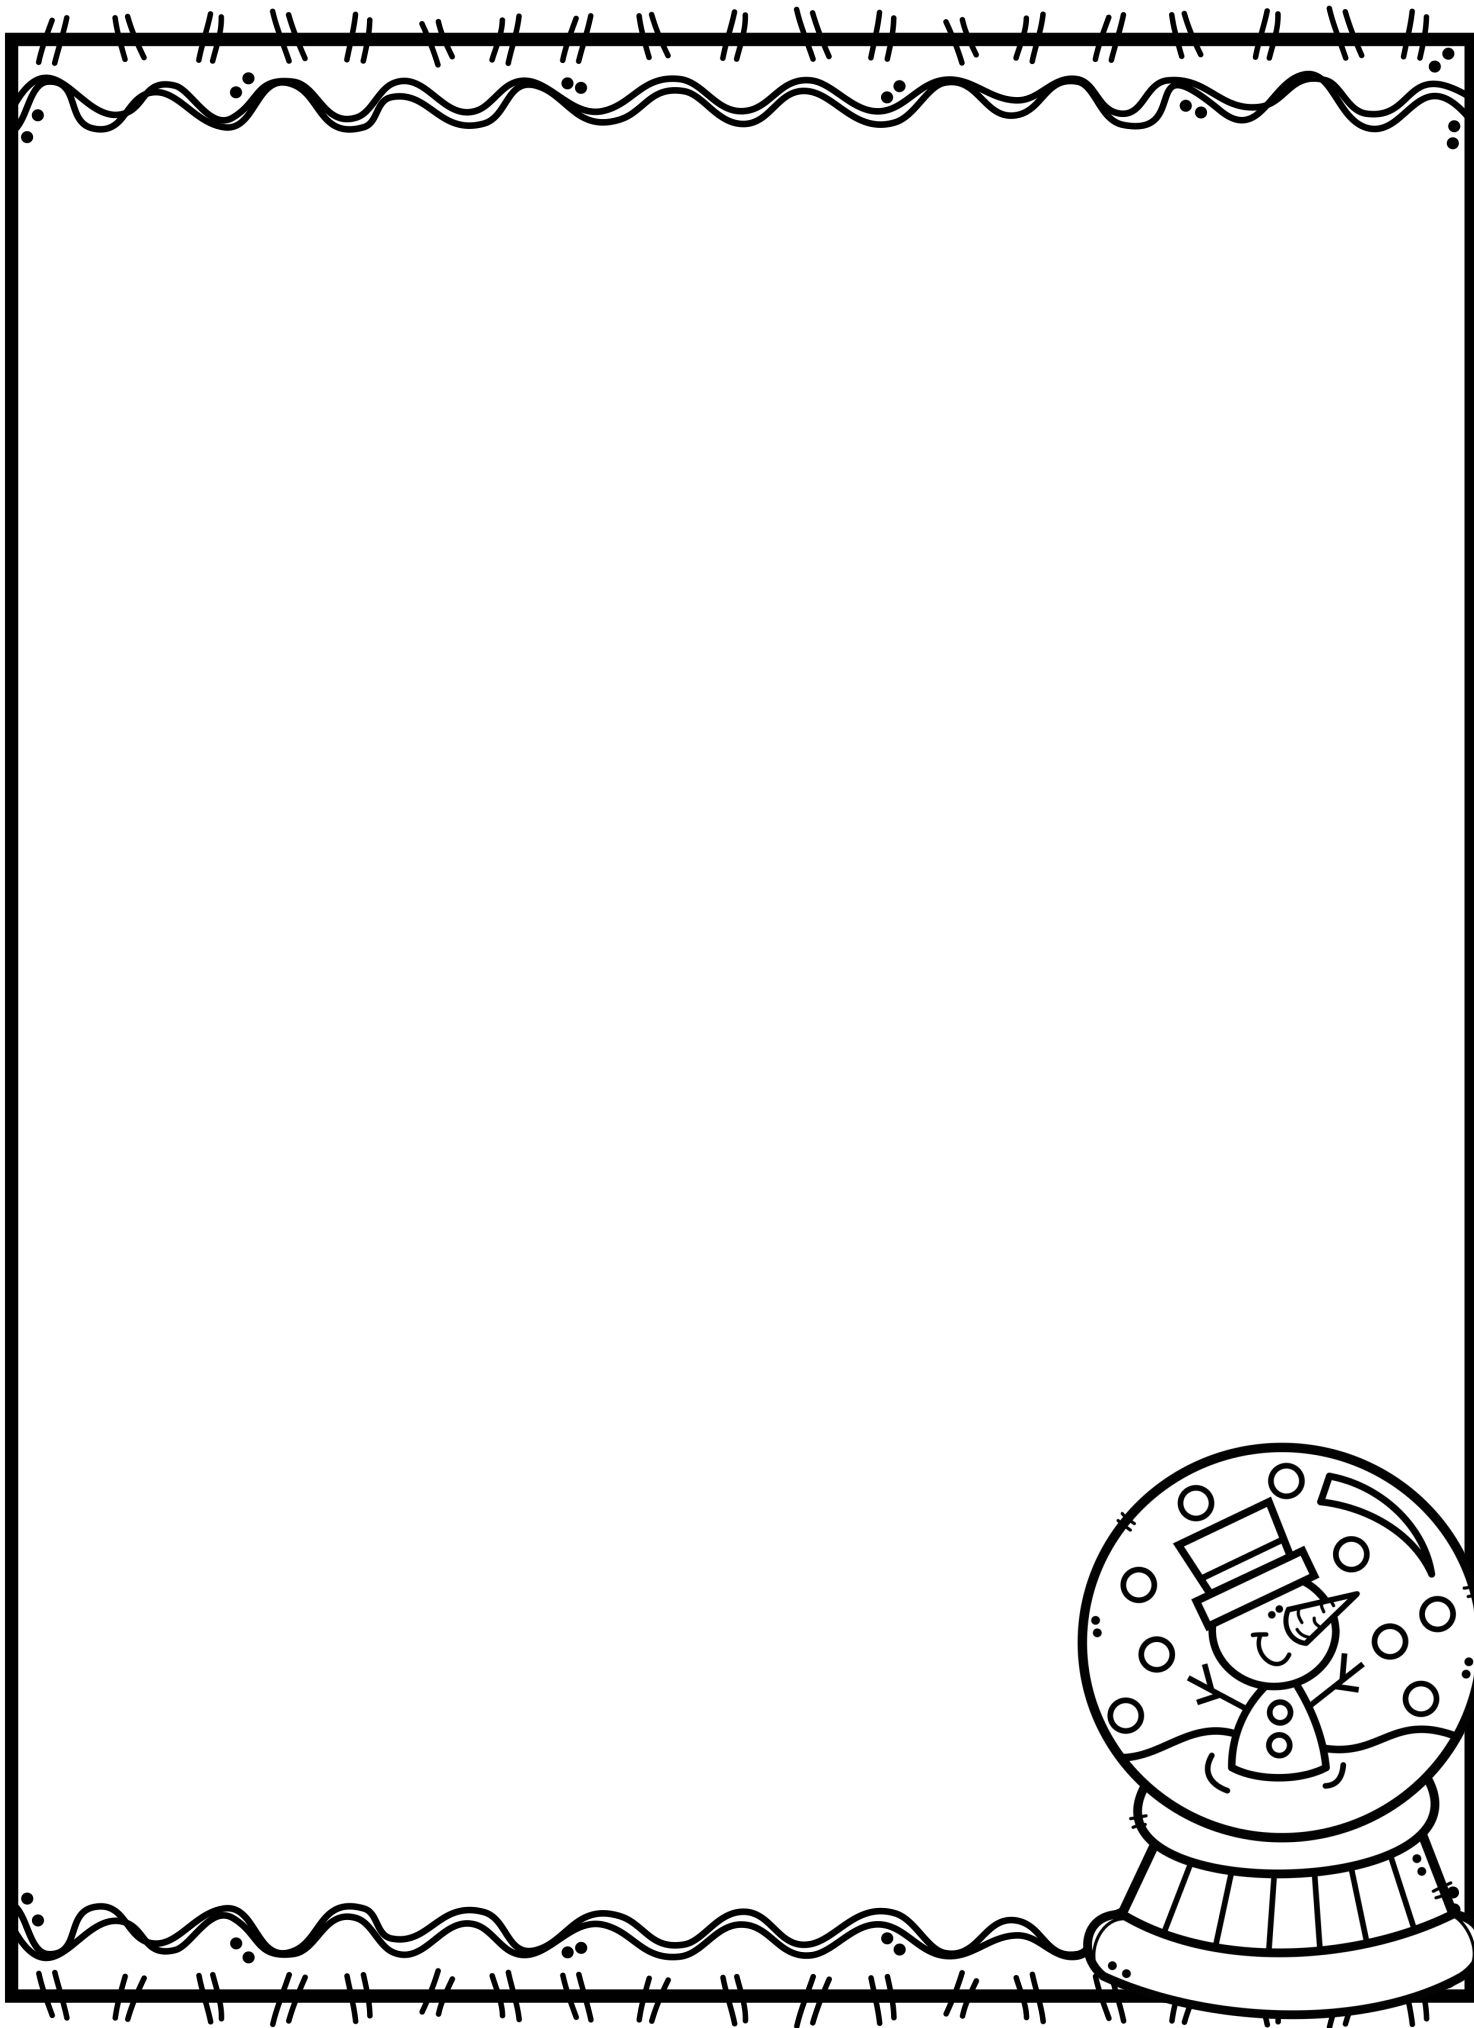

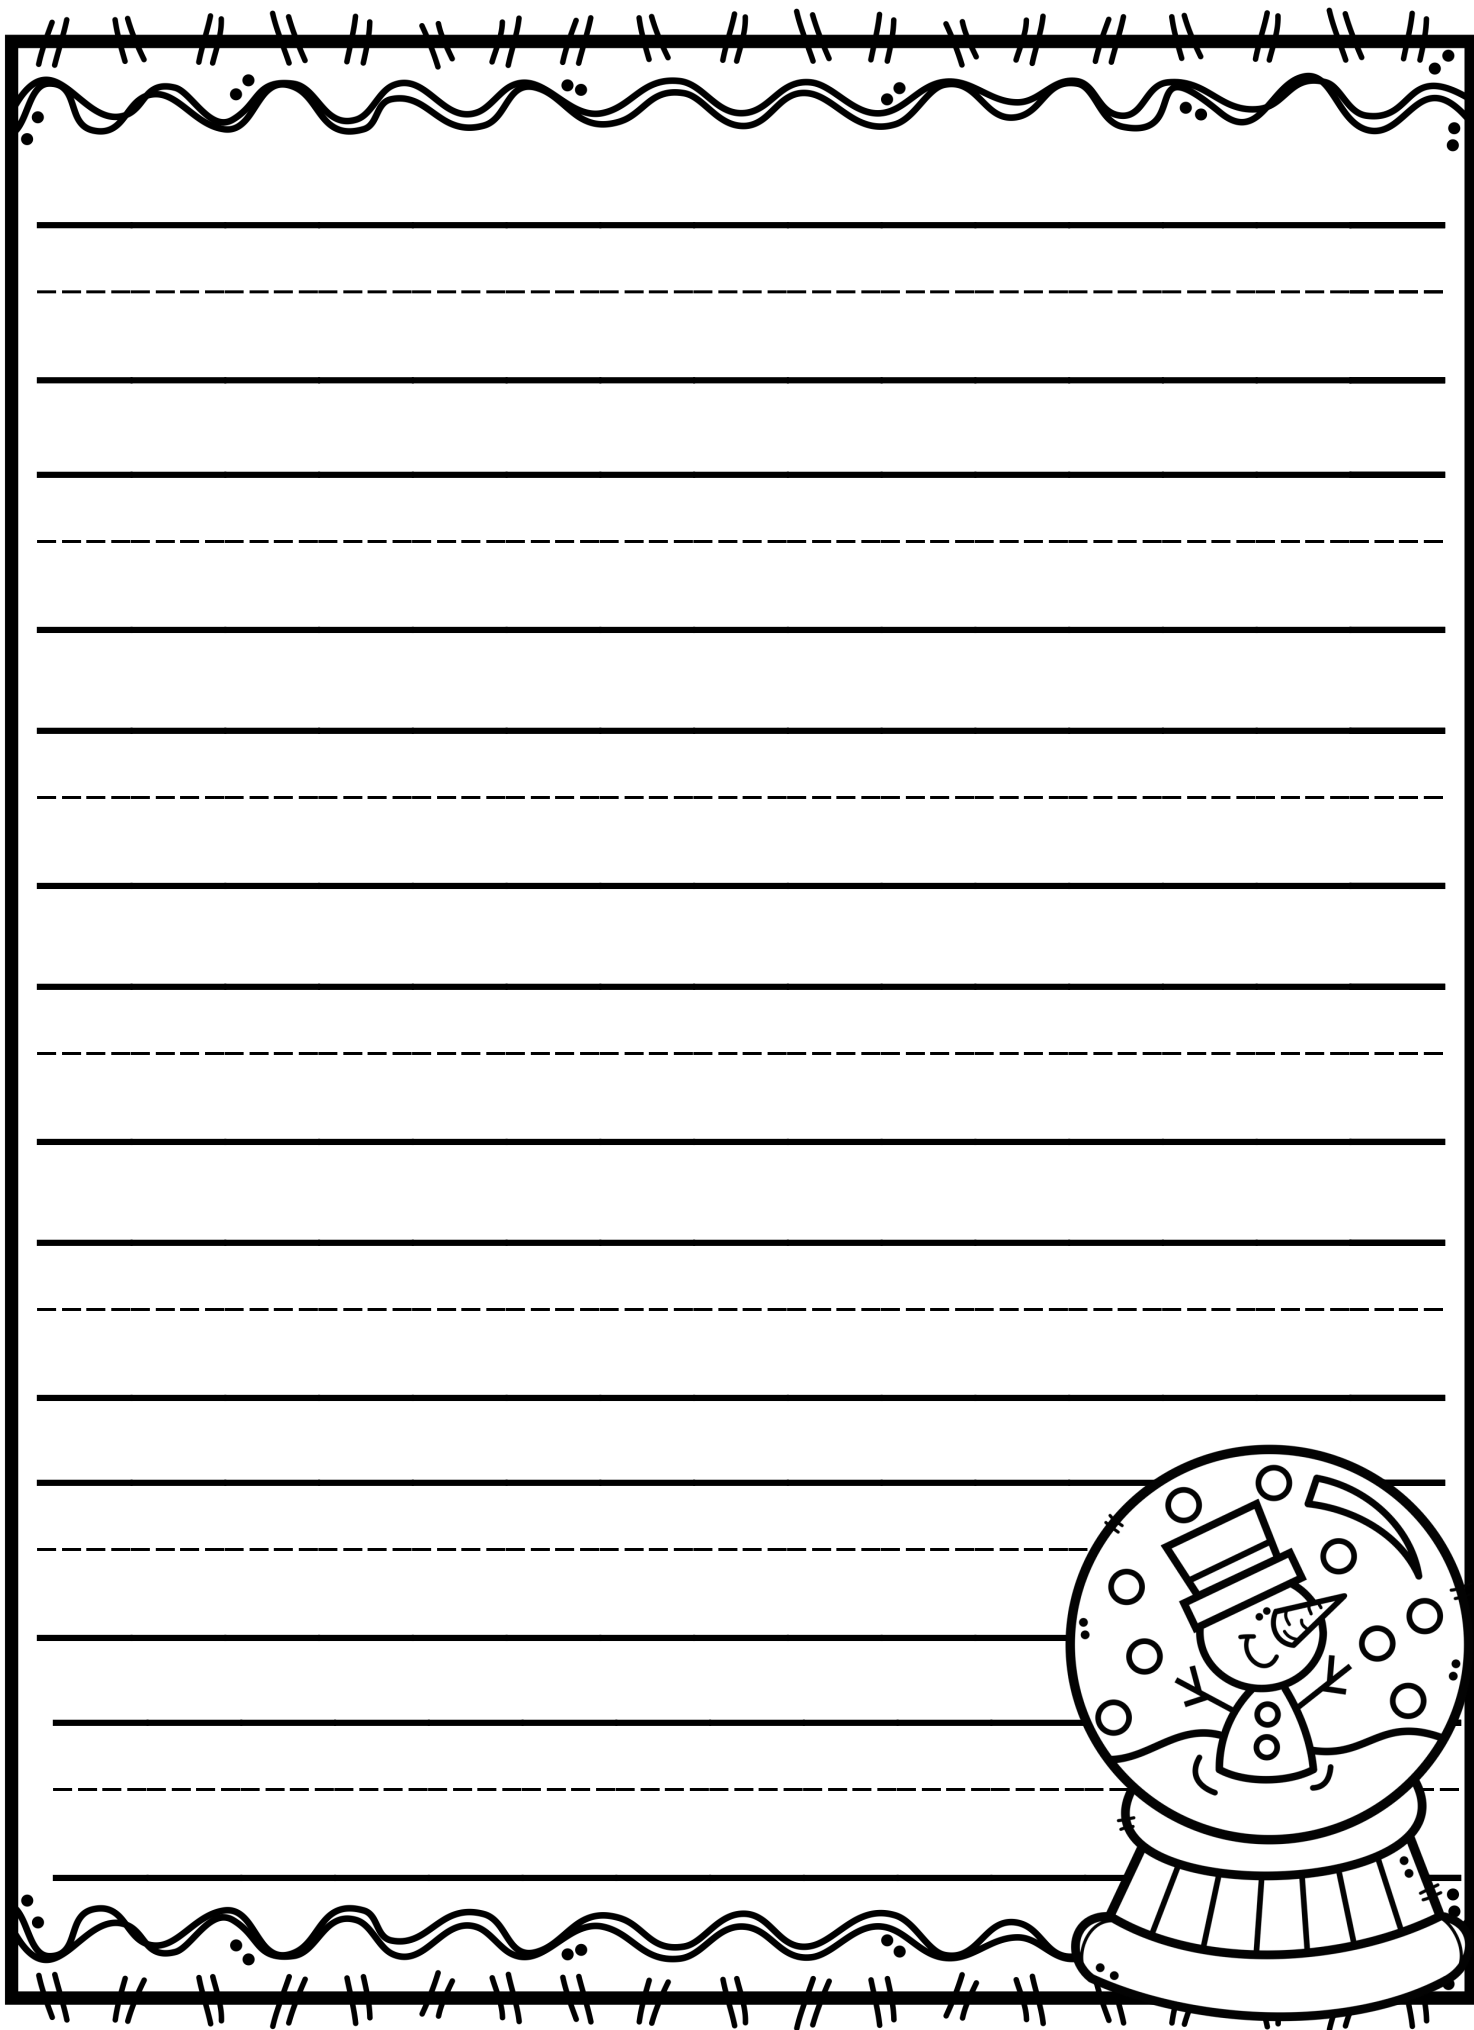

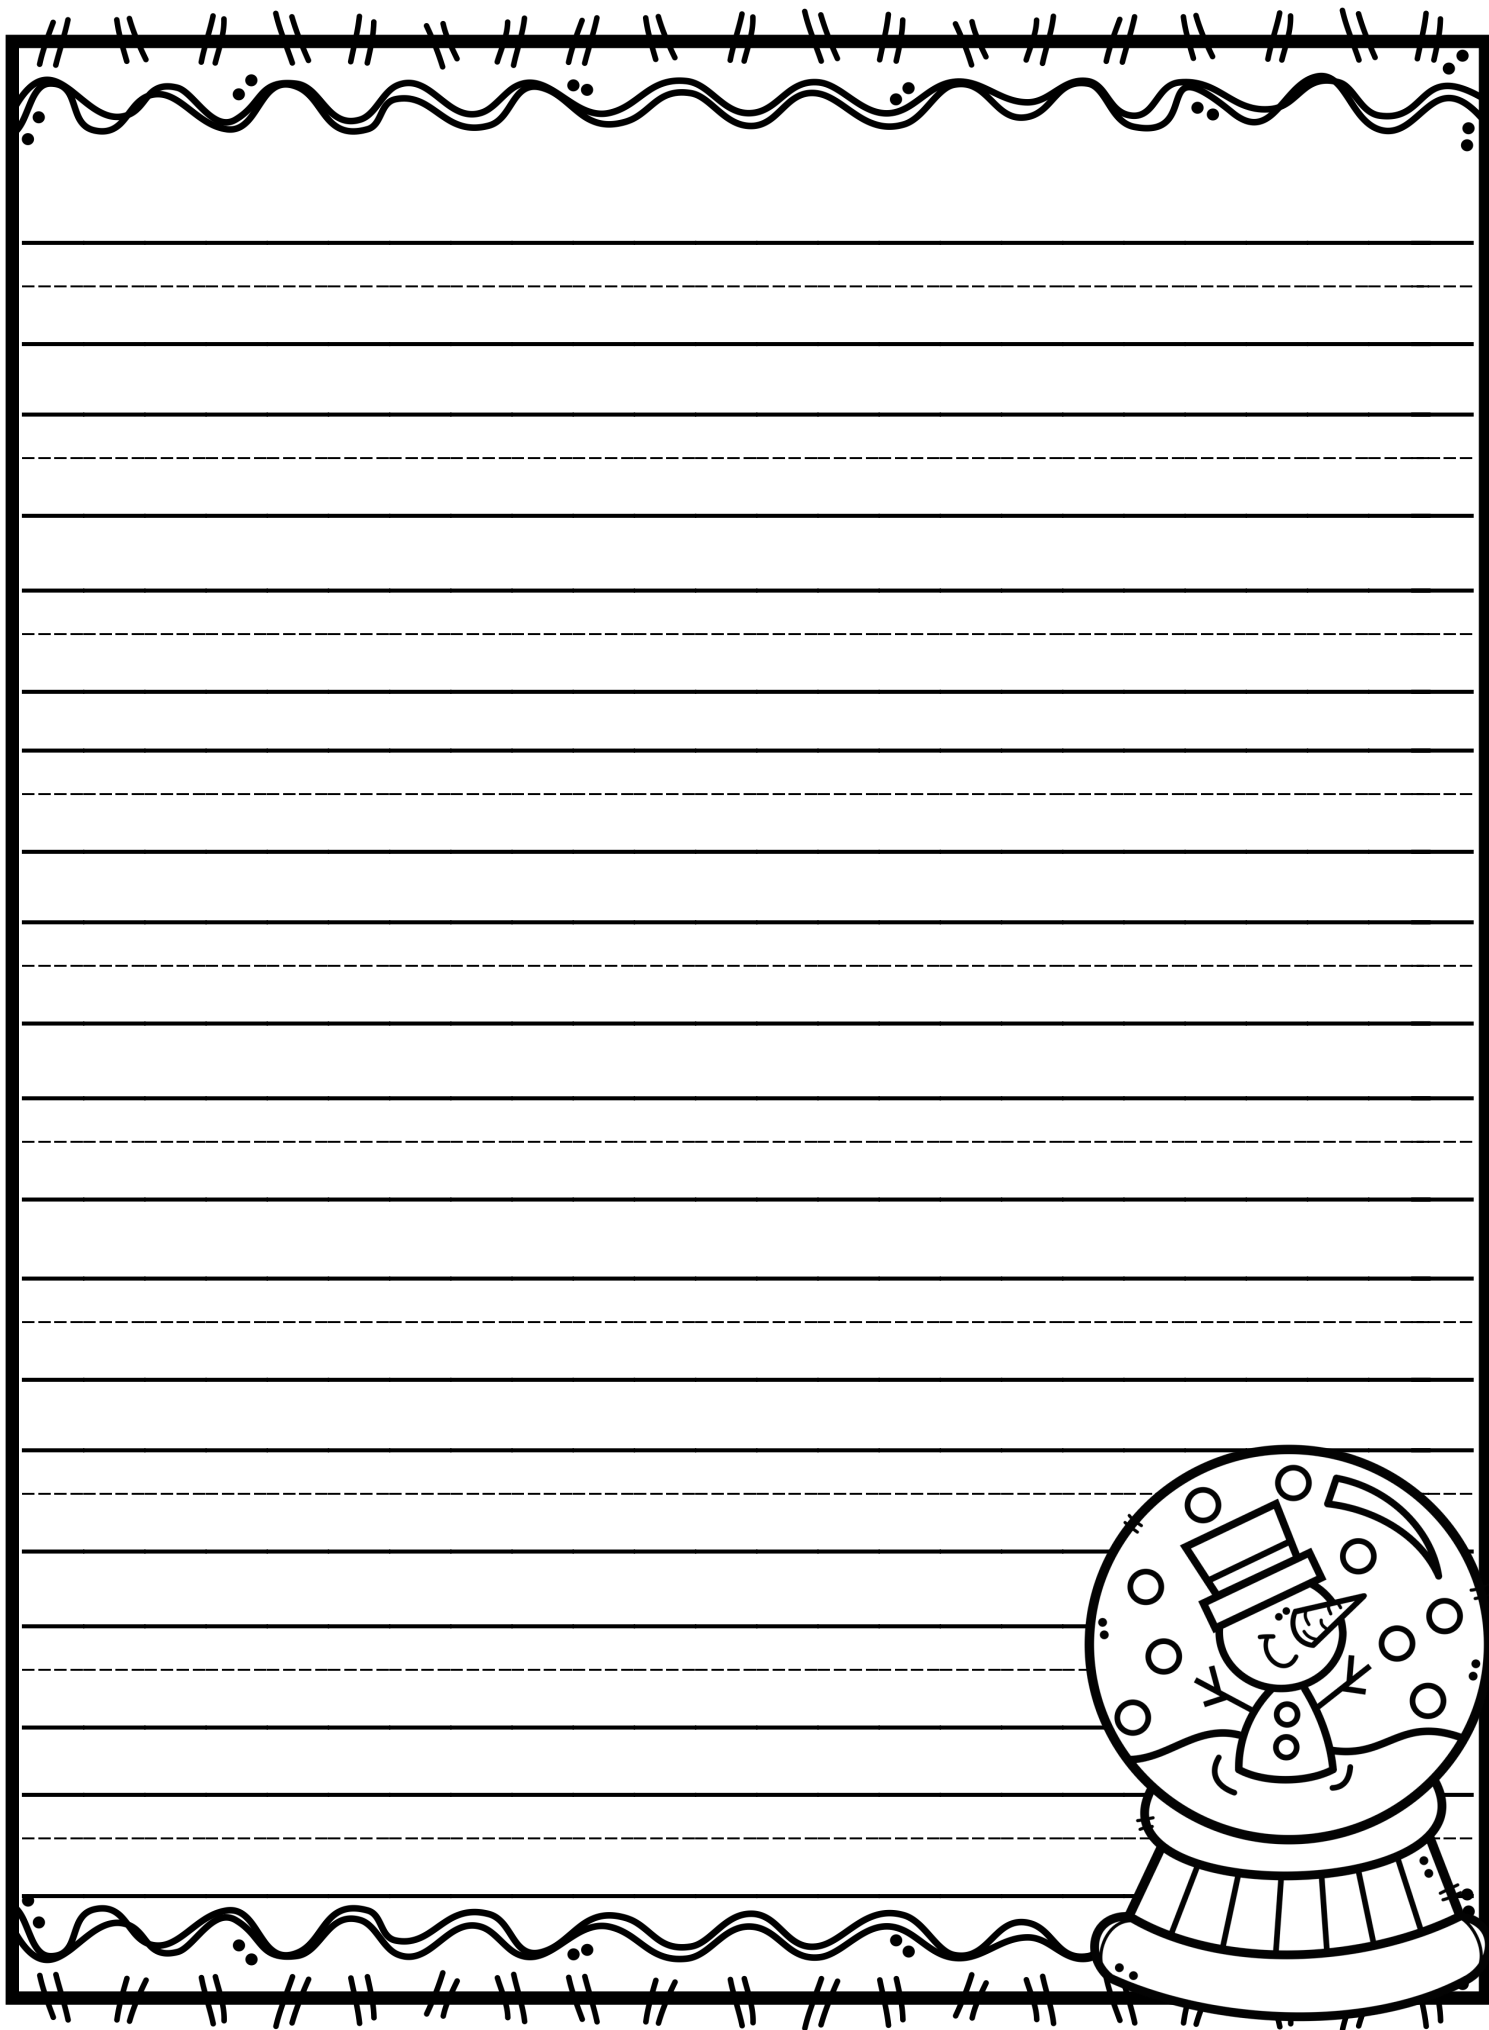

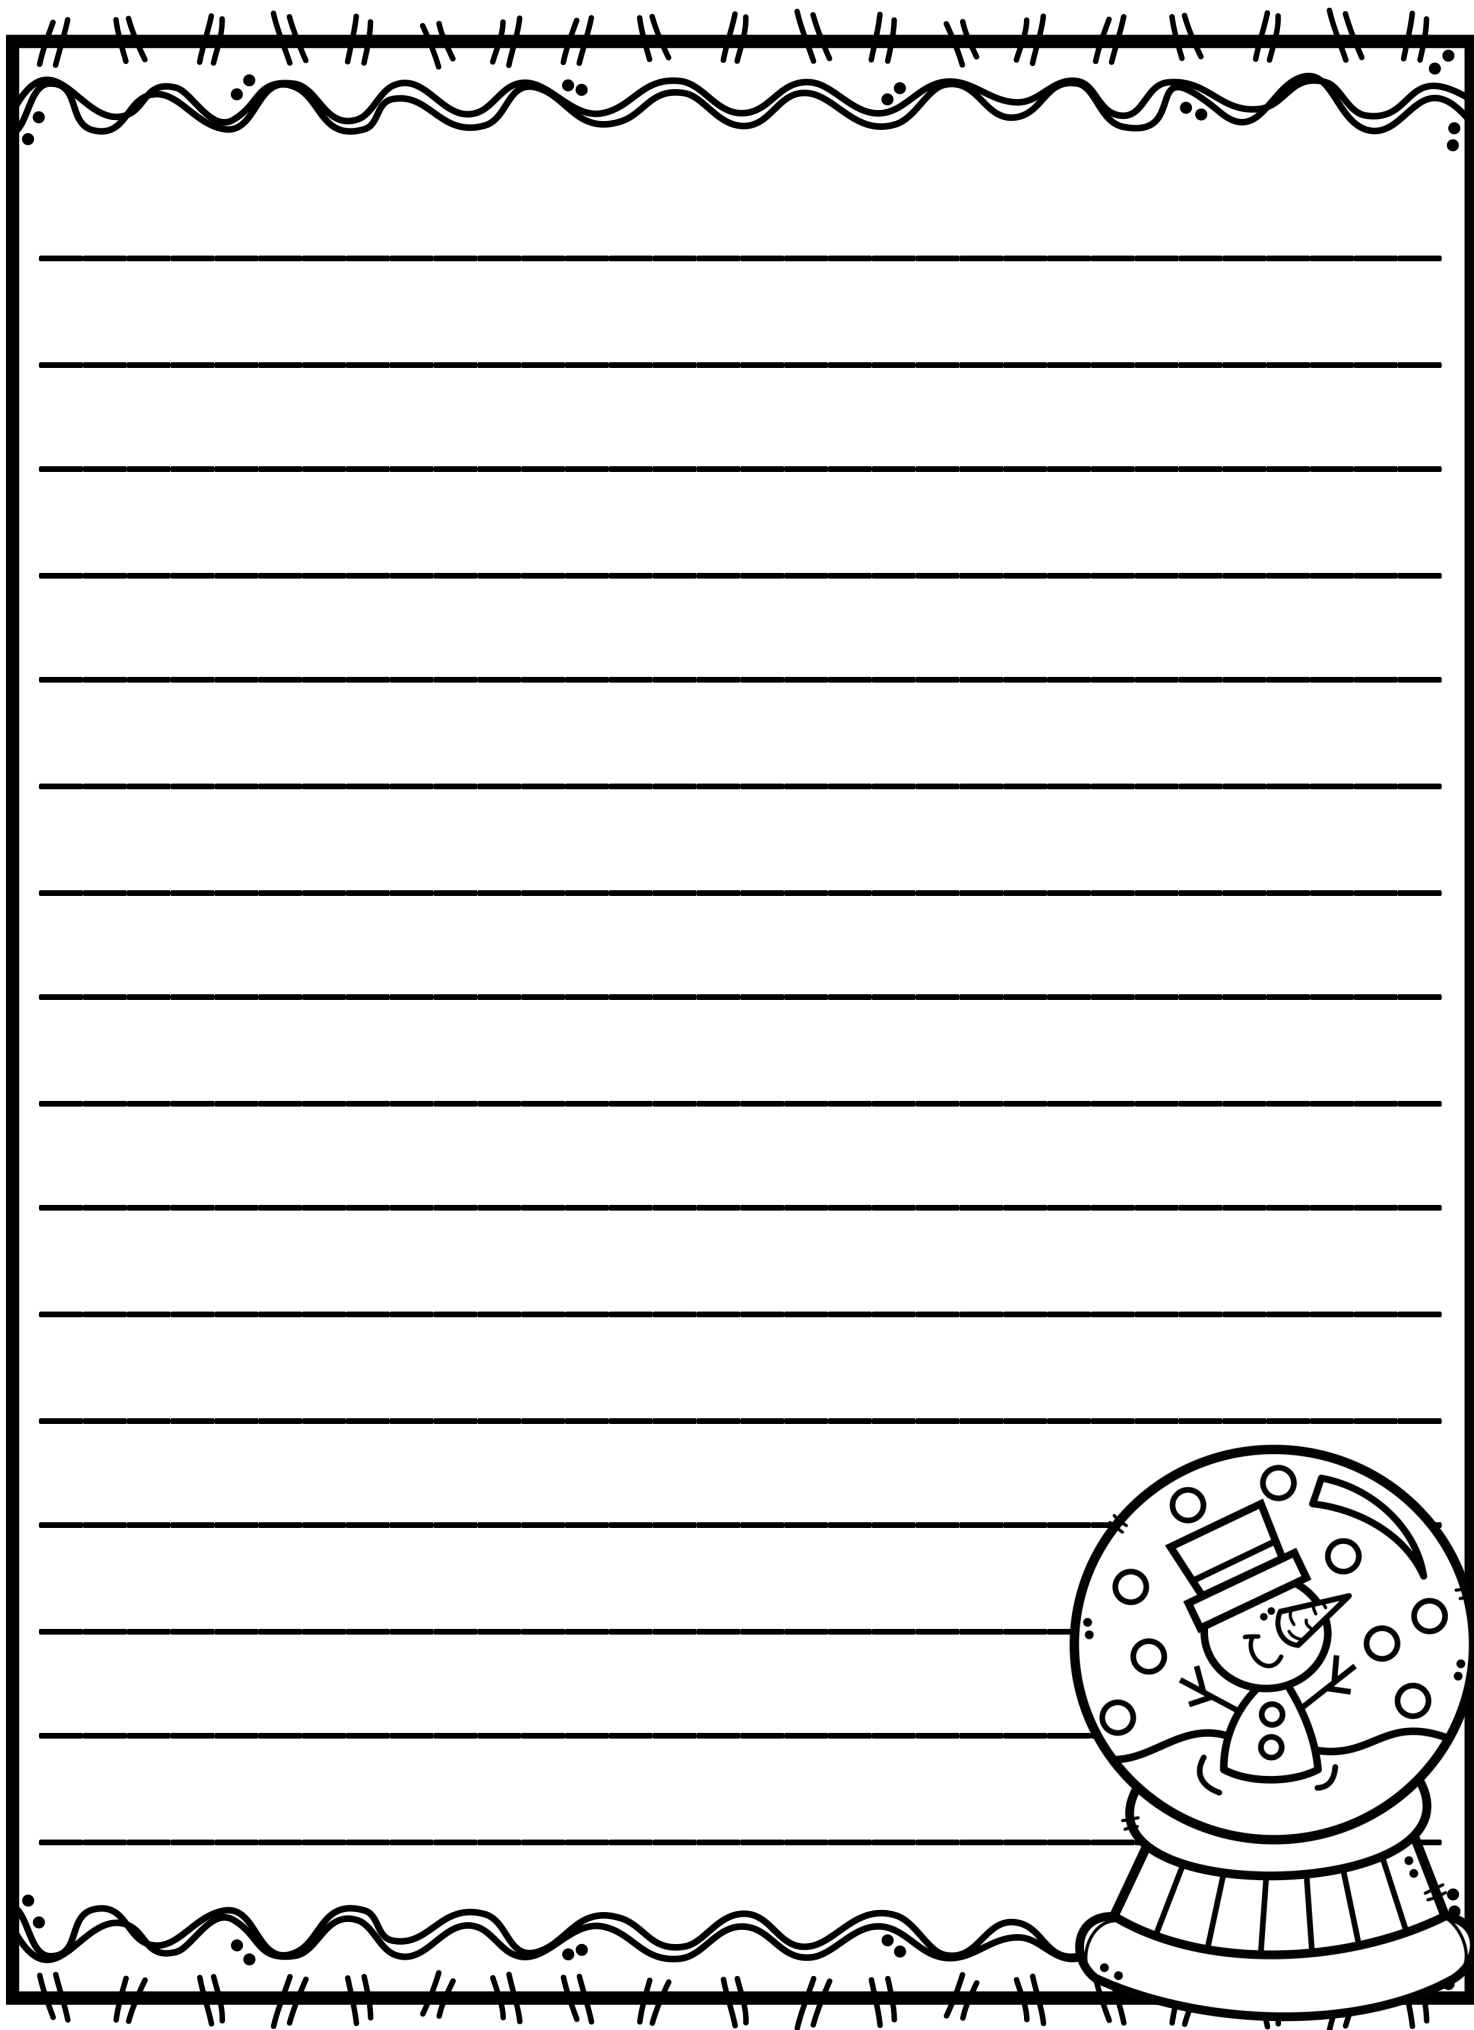

Handwriting practice lines consisting of solid top and bottom lines with a dashed middle line for letter height guidance. The page contains 10 sets of these lines.

[illegible]

Blank lined paper template with 15 horizontal lines.

Thank You for your purchase!

By purchasing this product, you are granted a single-user license to be used in ONE classroom or by ONE teacher. This product cannot be copied, redistributed or posted for others in any form.

****THIS IS NOT CLIPART****

Unlike many listings in my TpT store, this is not clipart and CANNOT be used in any way for your own products or freebies.

Please remember that creating your own printable crafts with Creative Clips Clipart is not permitted under my clipart TOU. This craft is available because it was created directly by myself, the original graphic artist.

If you have any questions, please contact me through the question section of my TpT store!

Enjoy!
