

Paper Cars

PACK 1

Assembly Instructions

KIKA Made Printables

Thank you so much for downloading this package! I'm sure it's going to bring you a lot of joy and entertainment. Now, I want to make sure everything goes smoothly, so here are some detailed instructions for putting together the three cars from pack number one.

And please, if anything is unclear or you have any questions, don't hesitate to reach out to me right away.

I'm always happy to help!

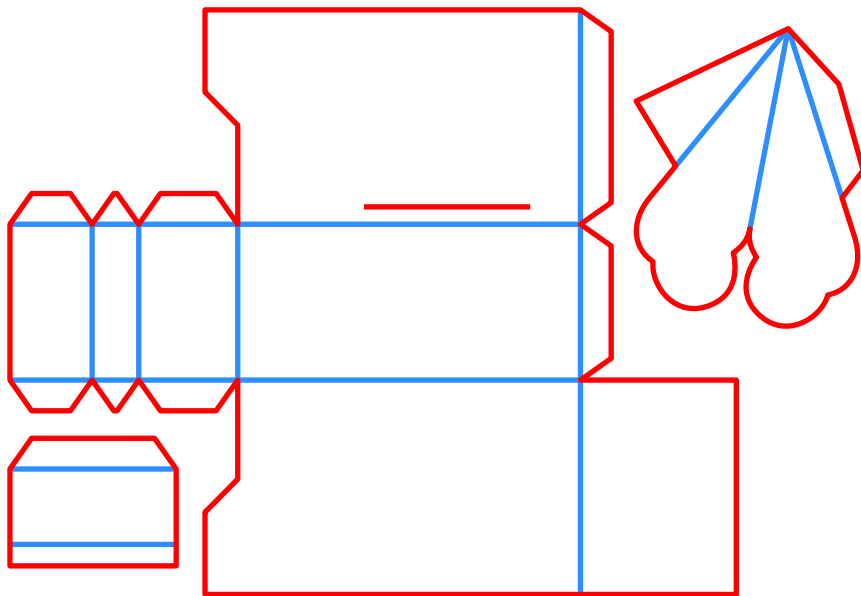

ICE CREAM TRUCK		page 3
FIRE ENGINE		page 11
SCHOOL BUS		page 17

Page 10 of 10

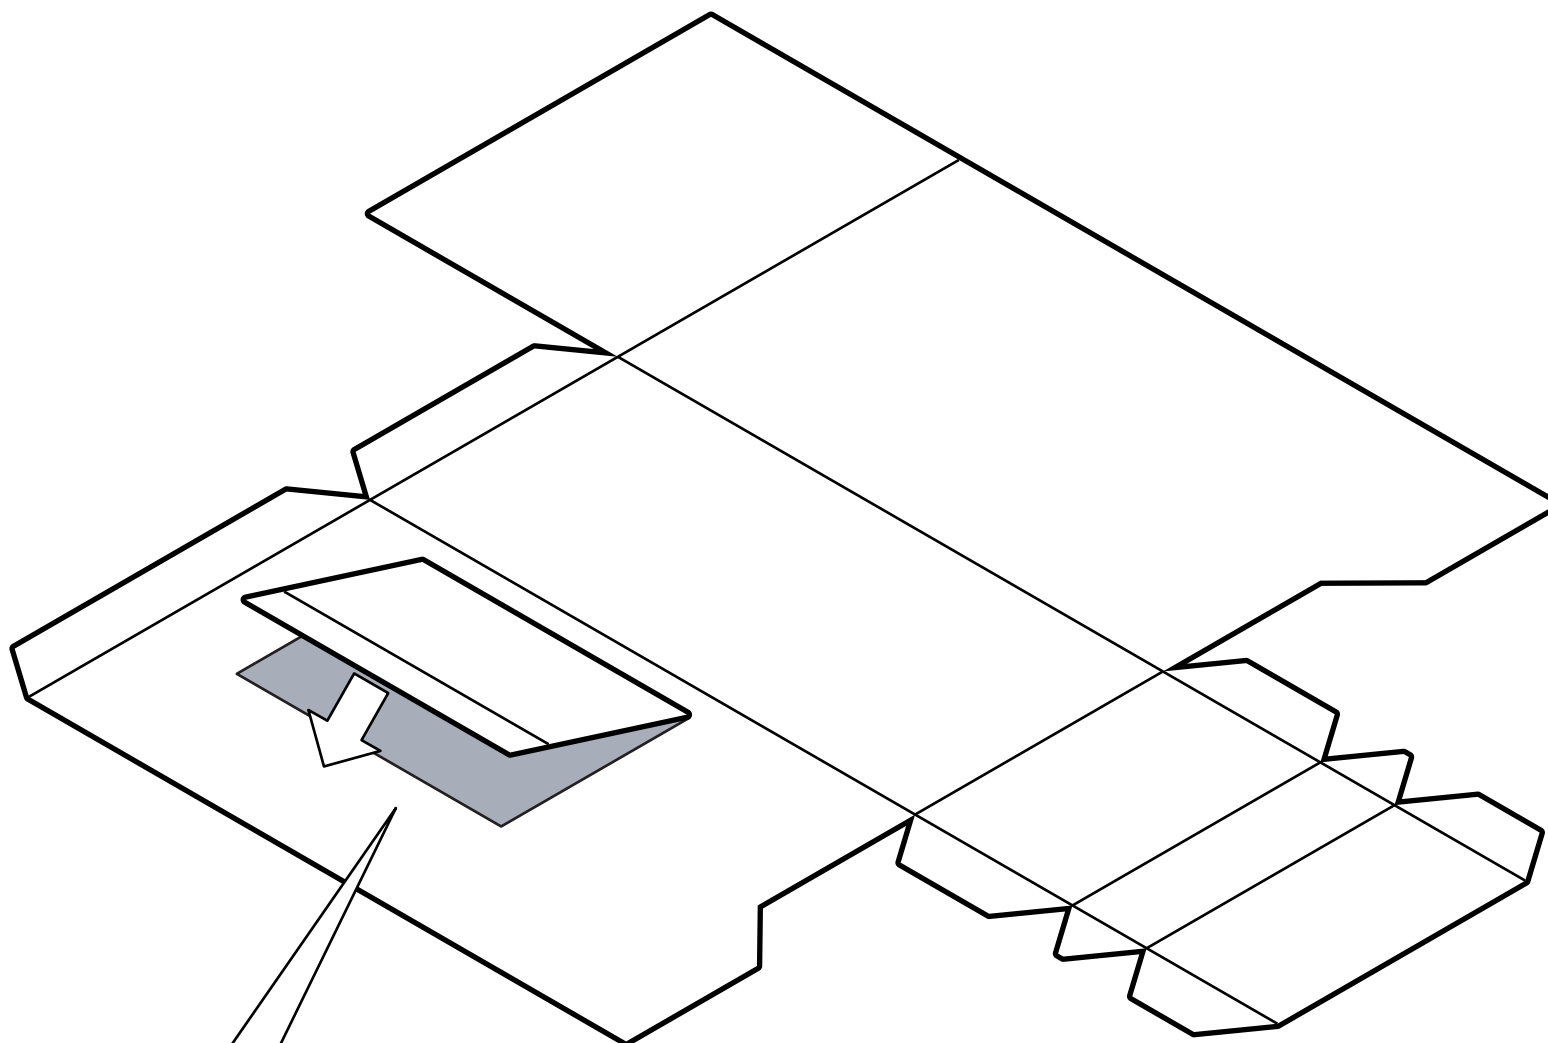

Step 1: Cut out the three component parts on the outer contour, marked in red in the diagram below, and fold along the lines marked in blue in the same diagram.

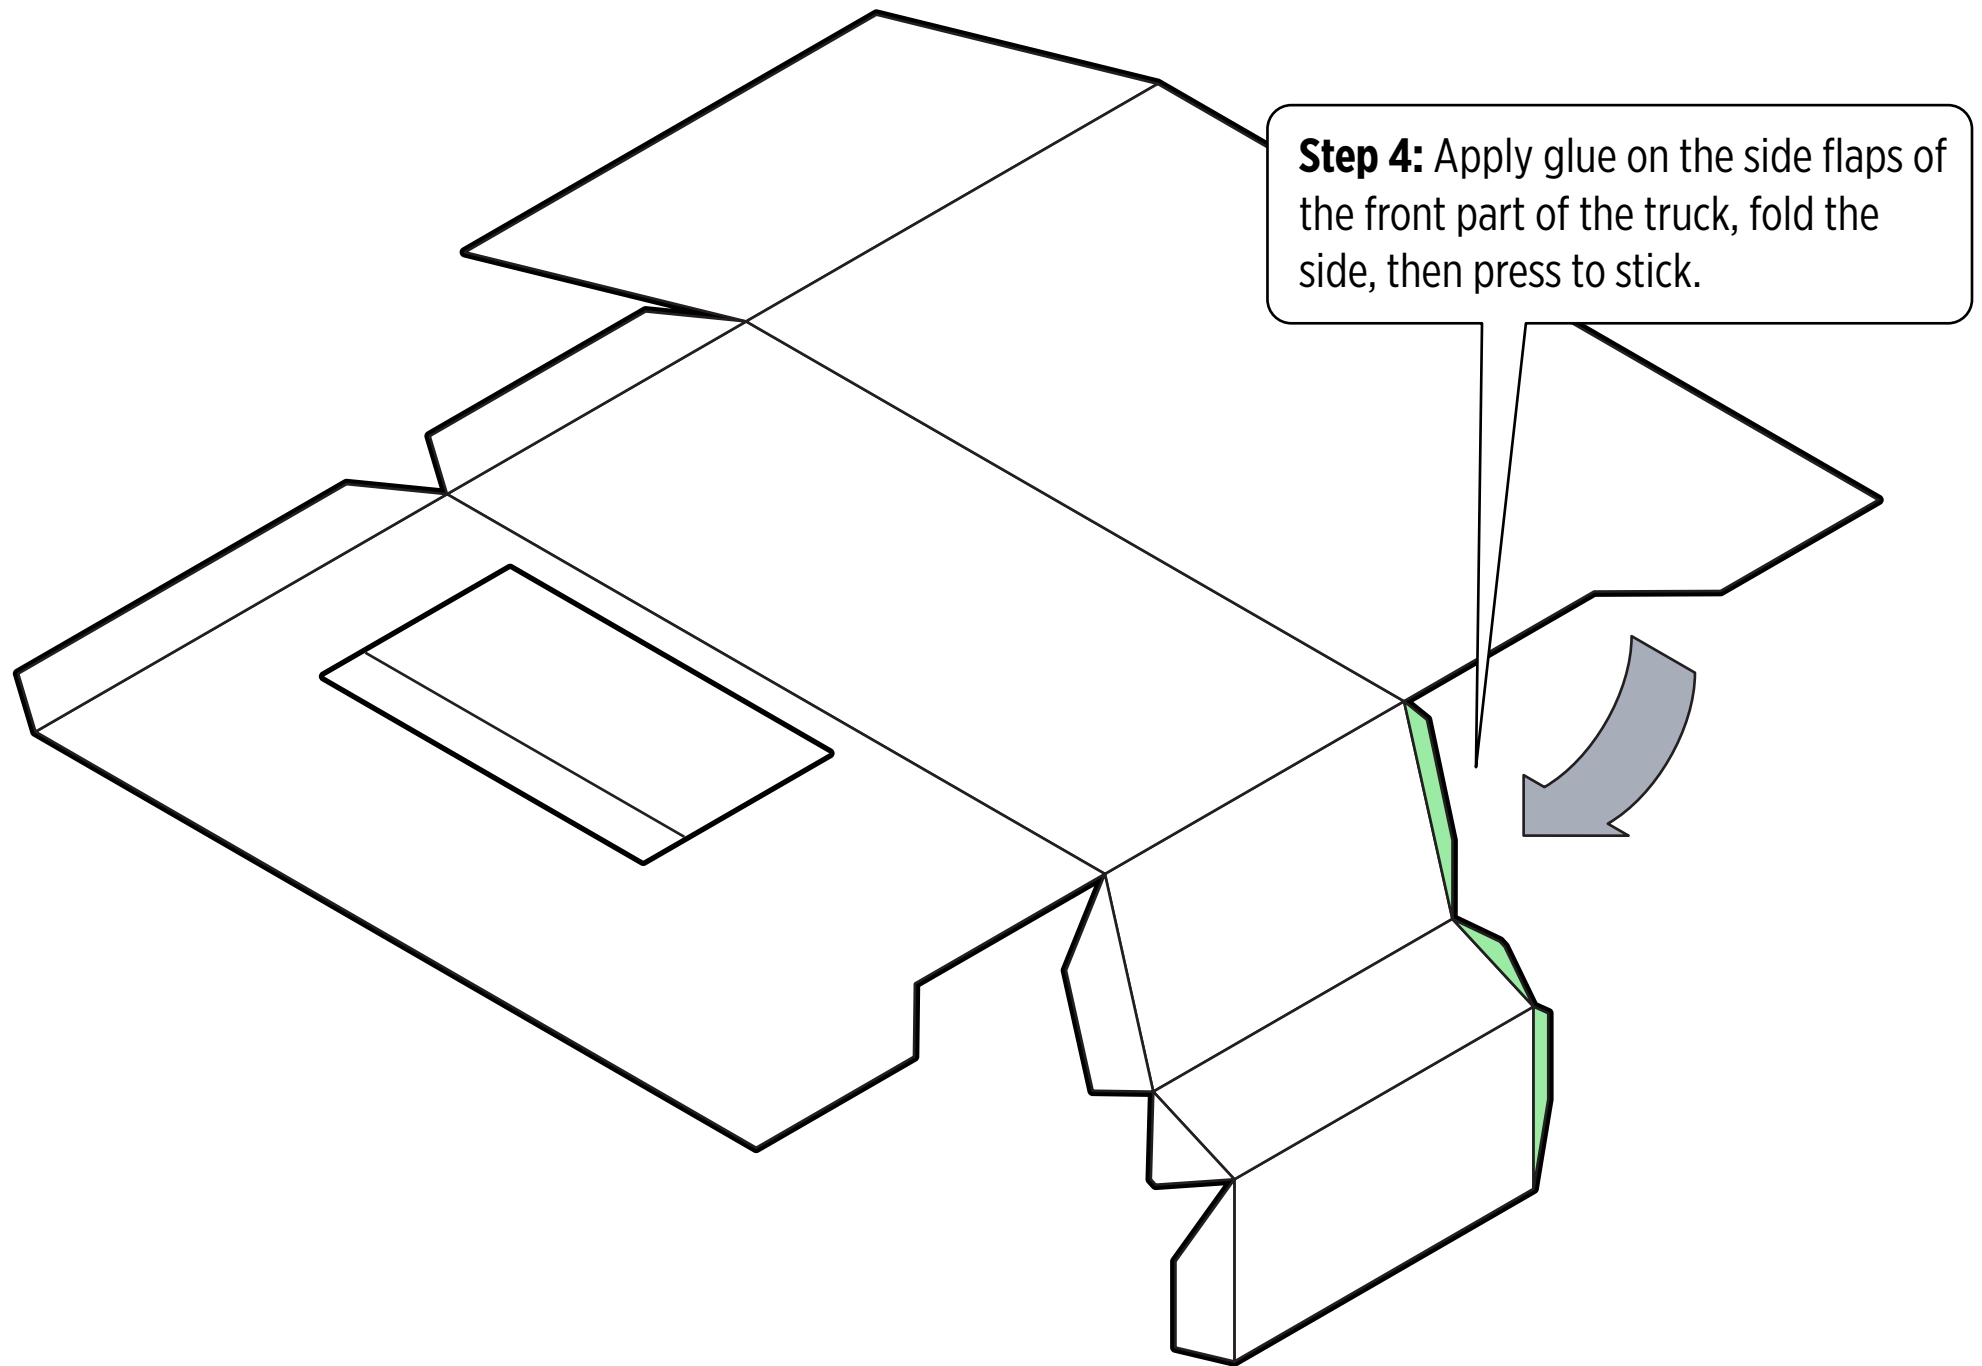

Step 2: Apply glue to the designated area of the awning*, then insert it into the cut on the side and press to stick.

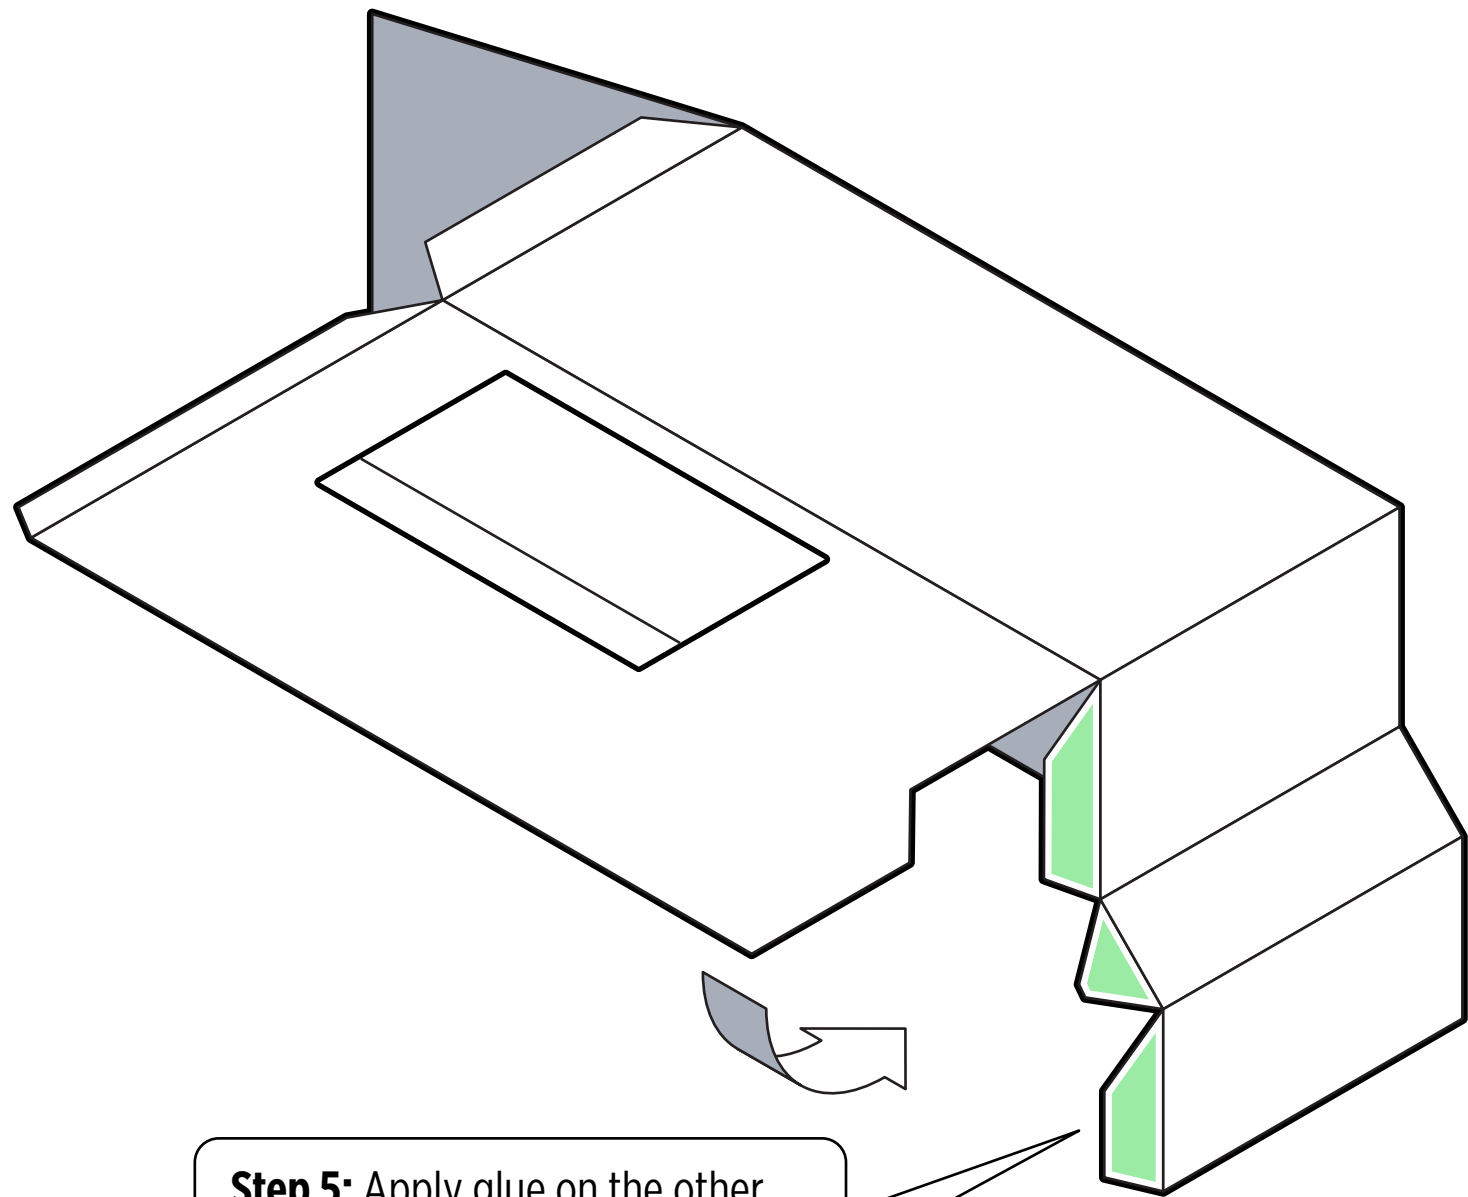

*the glue must be applied on the back, on the side that is not printed

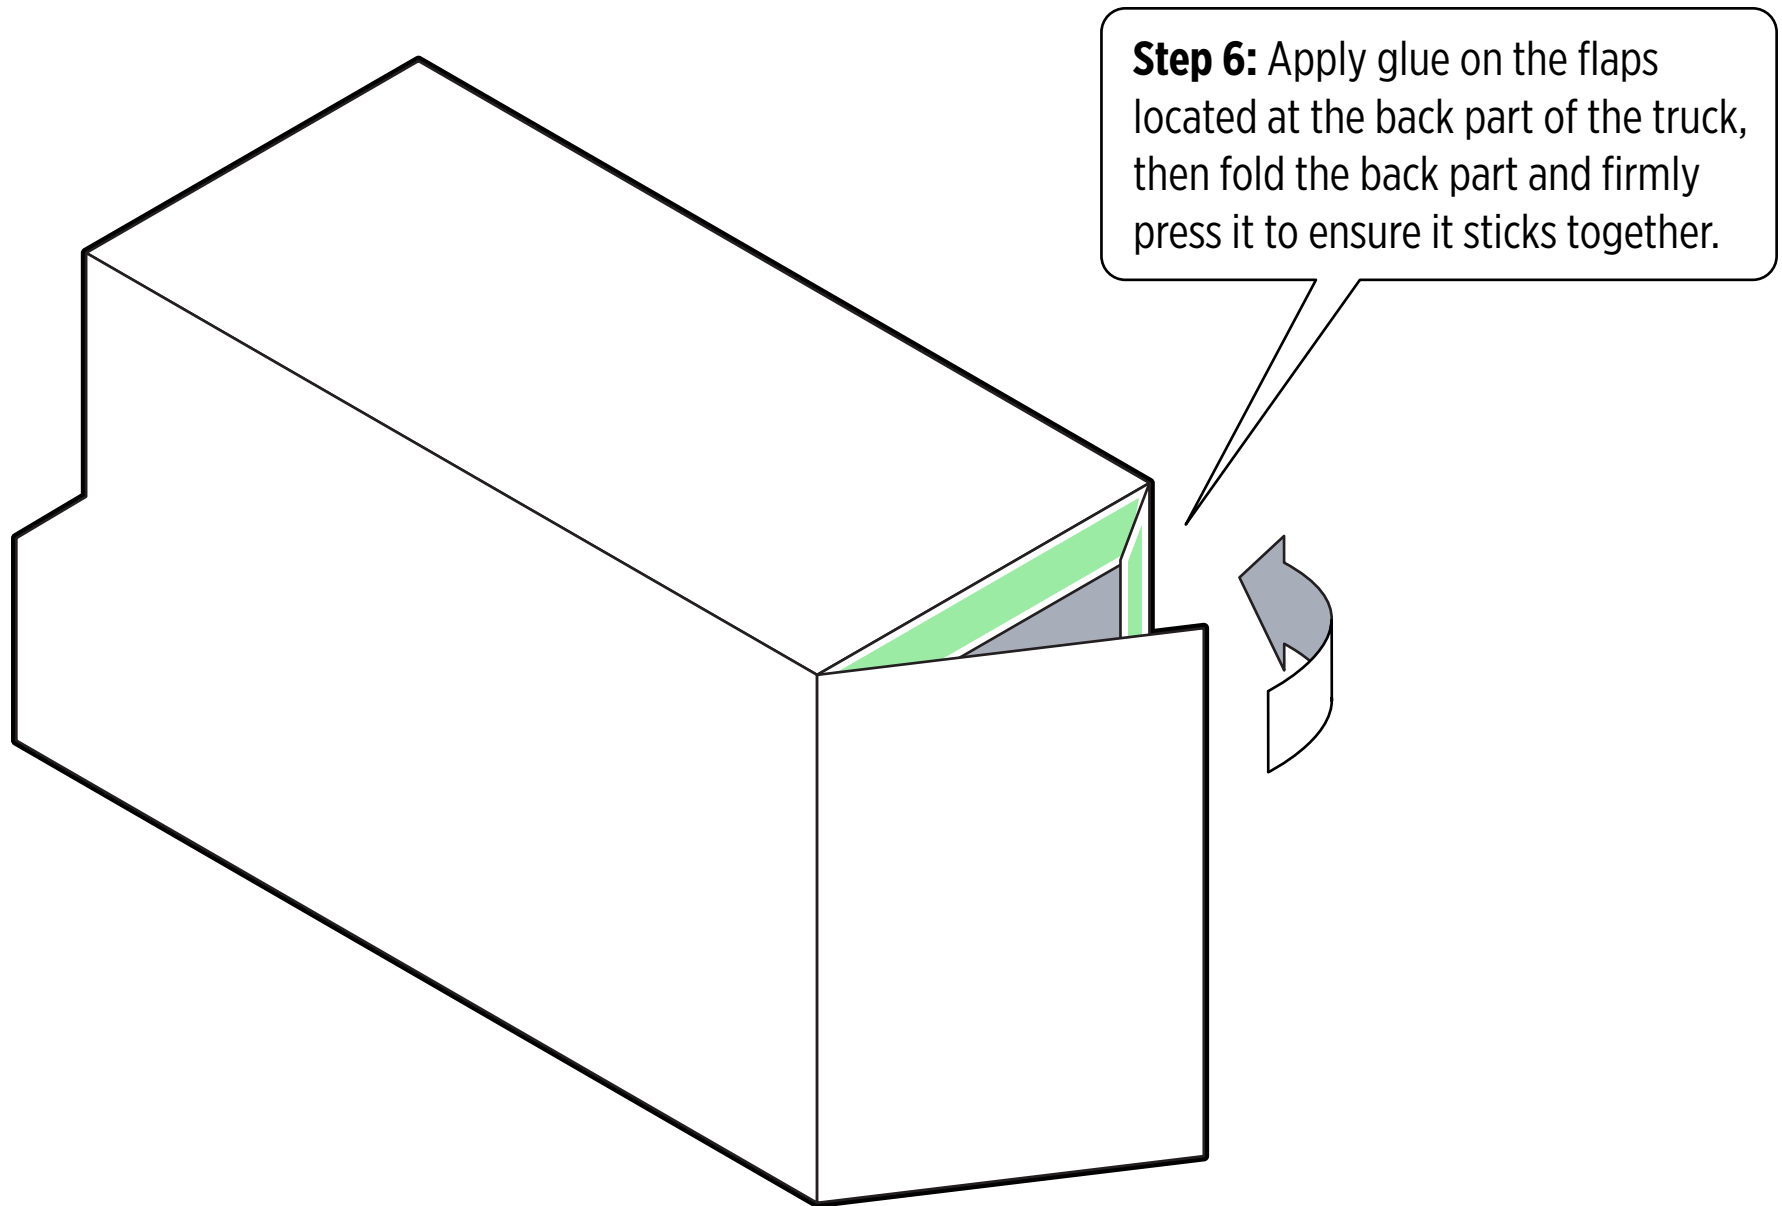

Step 3: Fold the awning component as in the diagram, to avoid obstructing the assembly process.

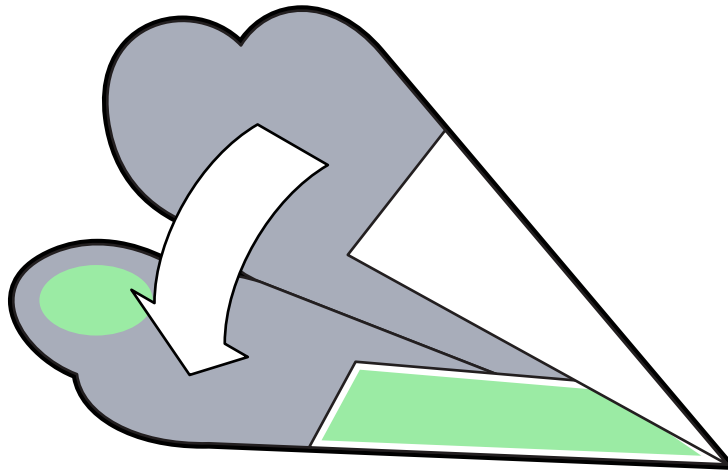

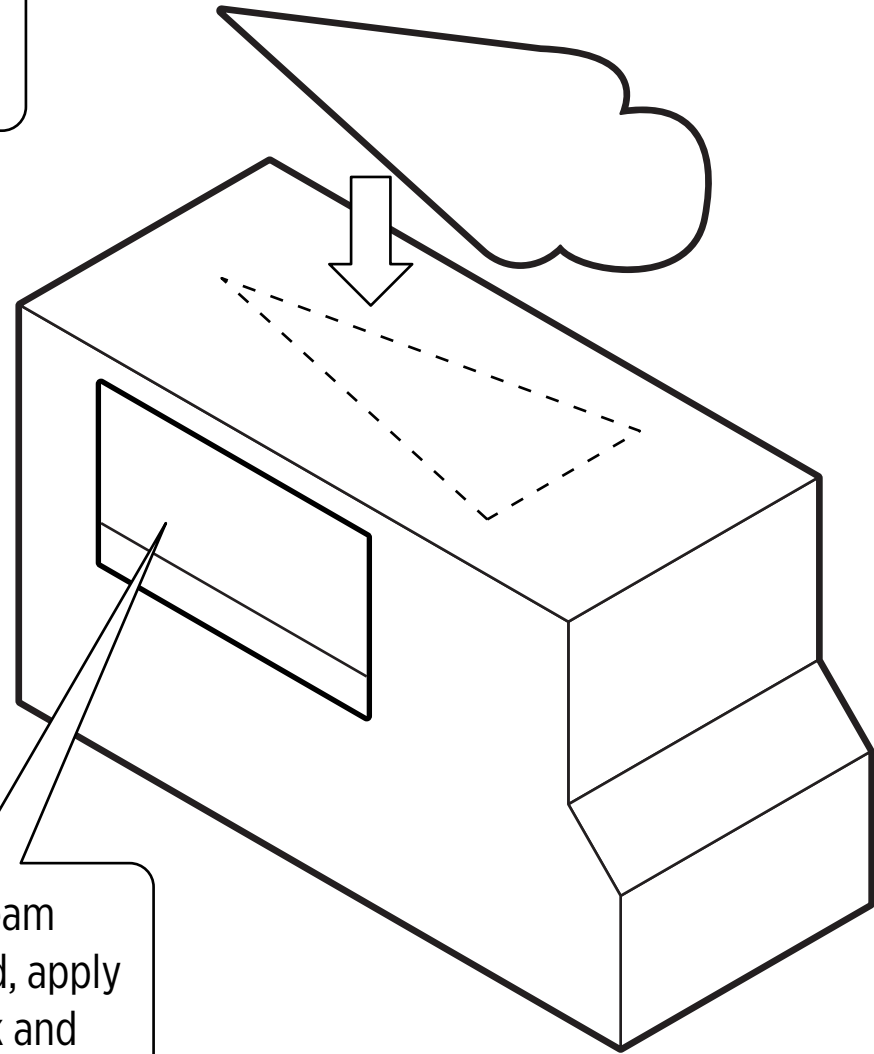

Step 5: Apply glue on the other side flaps, fold the truck side, then press to stick.

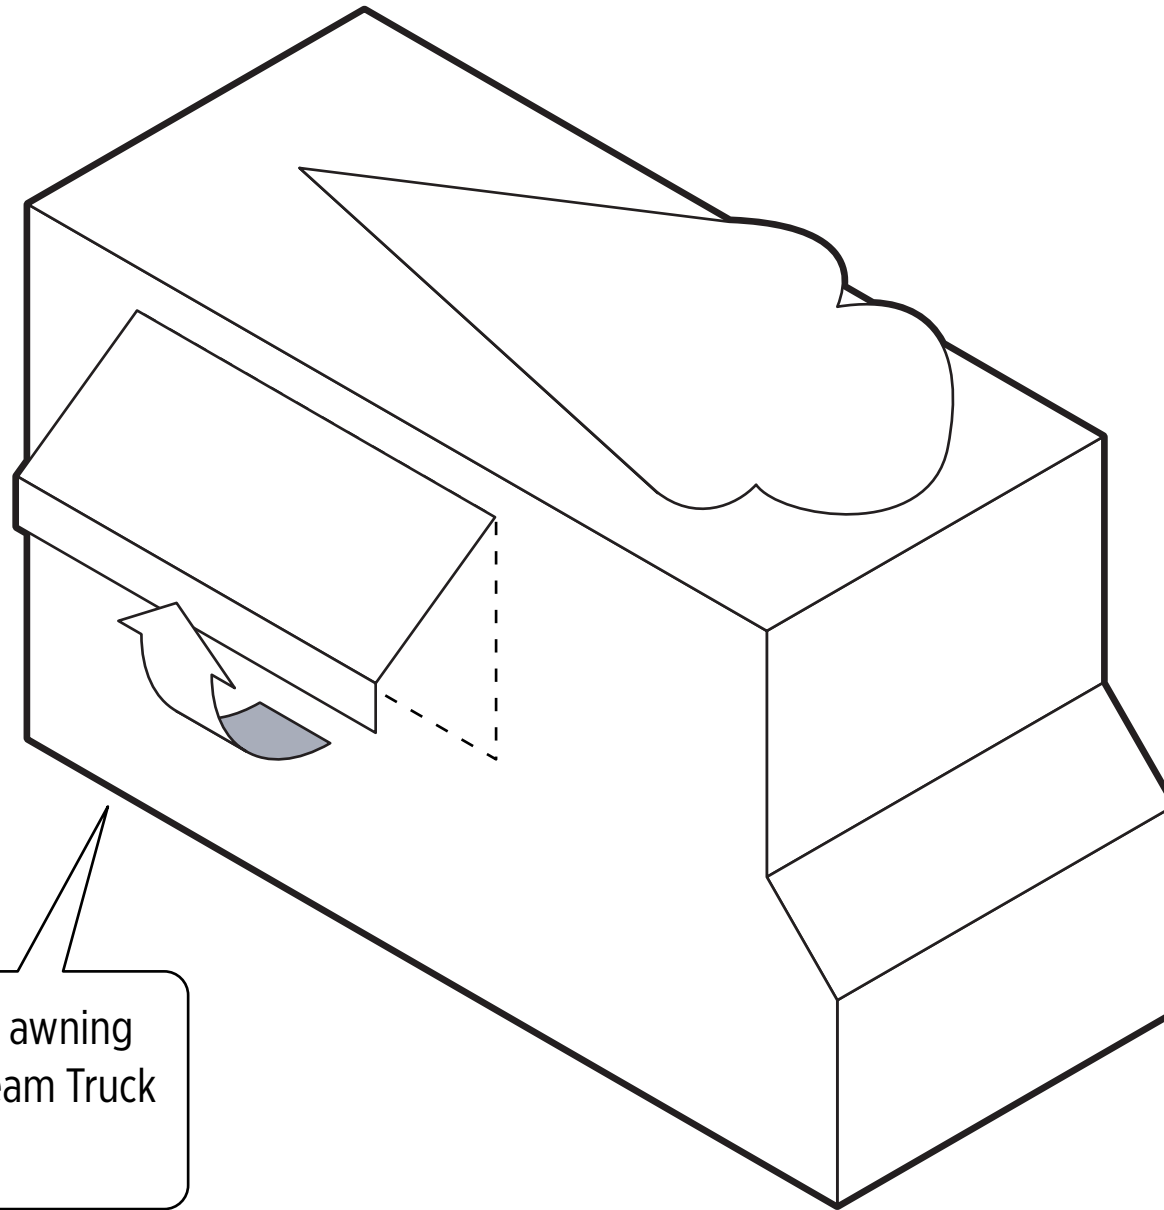

Step 7: The last piece is the ice cream decoration. Apply glue on the flap and to the designated area in the diagram, then fold it and firmly press it to ensure it sticks together.

Step 8: After the ice cream decoration is assembled, apply it to the top of the truck and press gently to adhere.

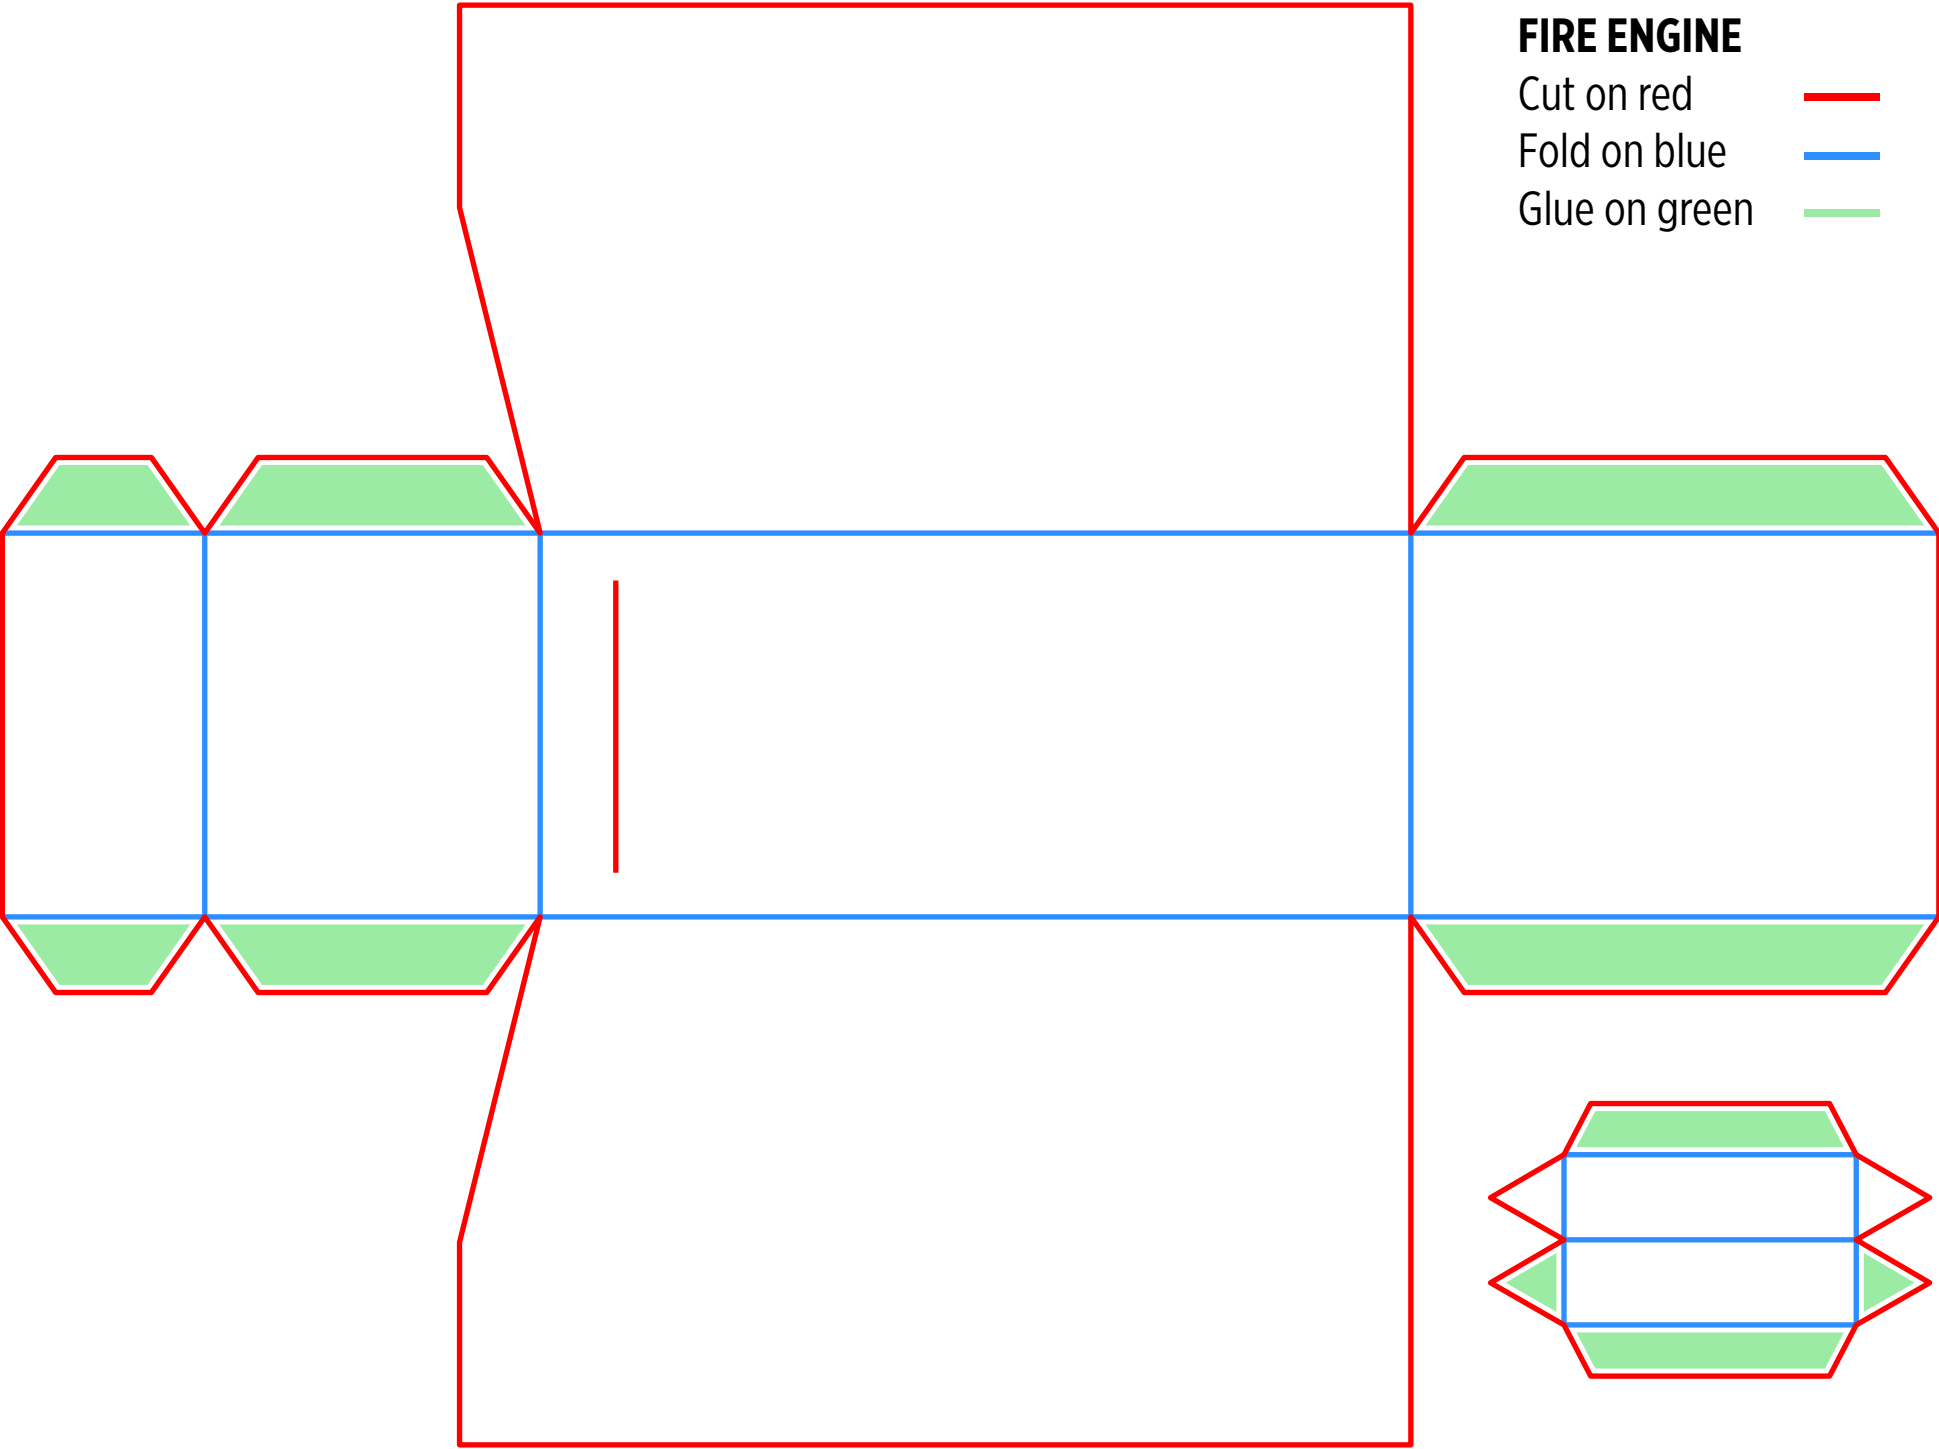

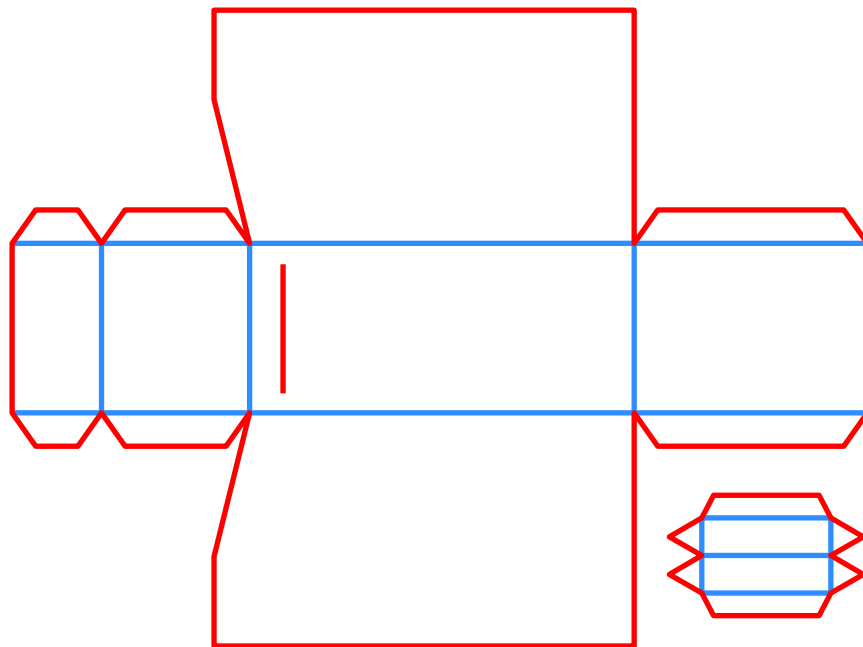

Step 9: Raise the awning in and the Ice Cream Truck is ready!

FIRE ENGINE

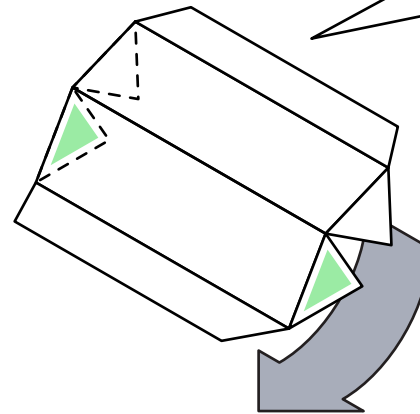

- Cut on red
- Fold on blue
- Glue on green

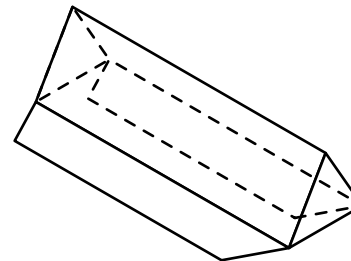

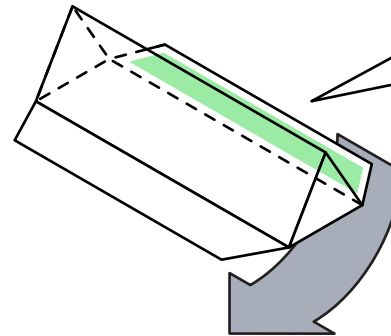

Step 1: Cut out the two component parts on the outer contour, marked in red in the diagram below, and fold along the lines marked in blue in the same diagram.

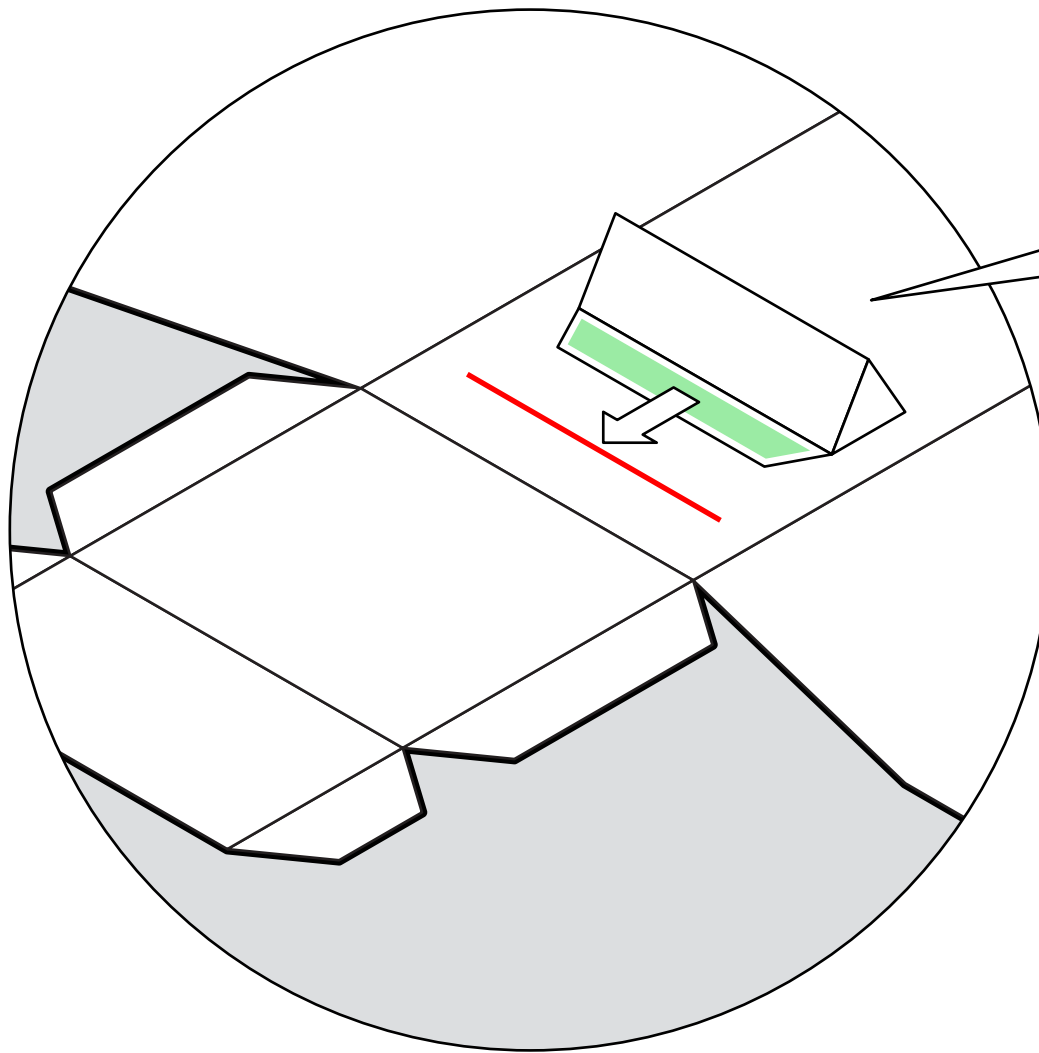

Step 2: The first component to be assembled is the light bar. Apply glue on two of the side flaps, fold the side, and then press to stick.

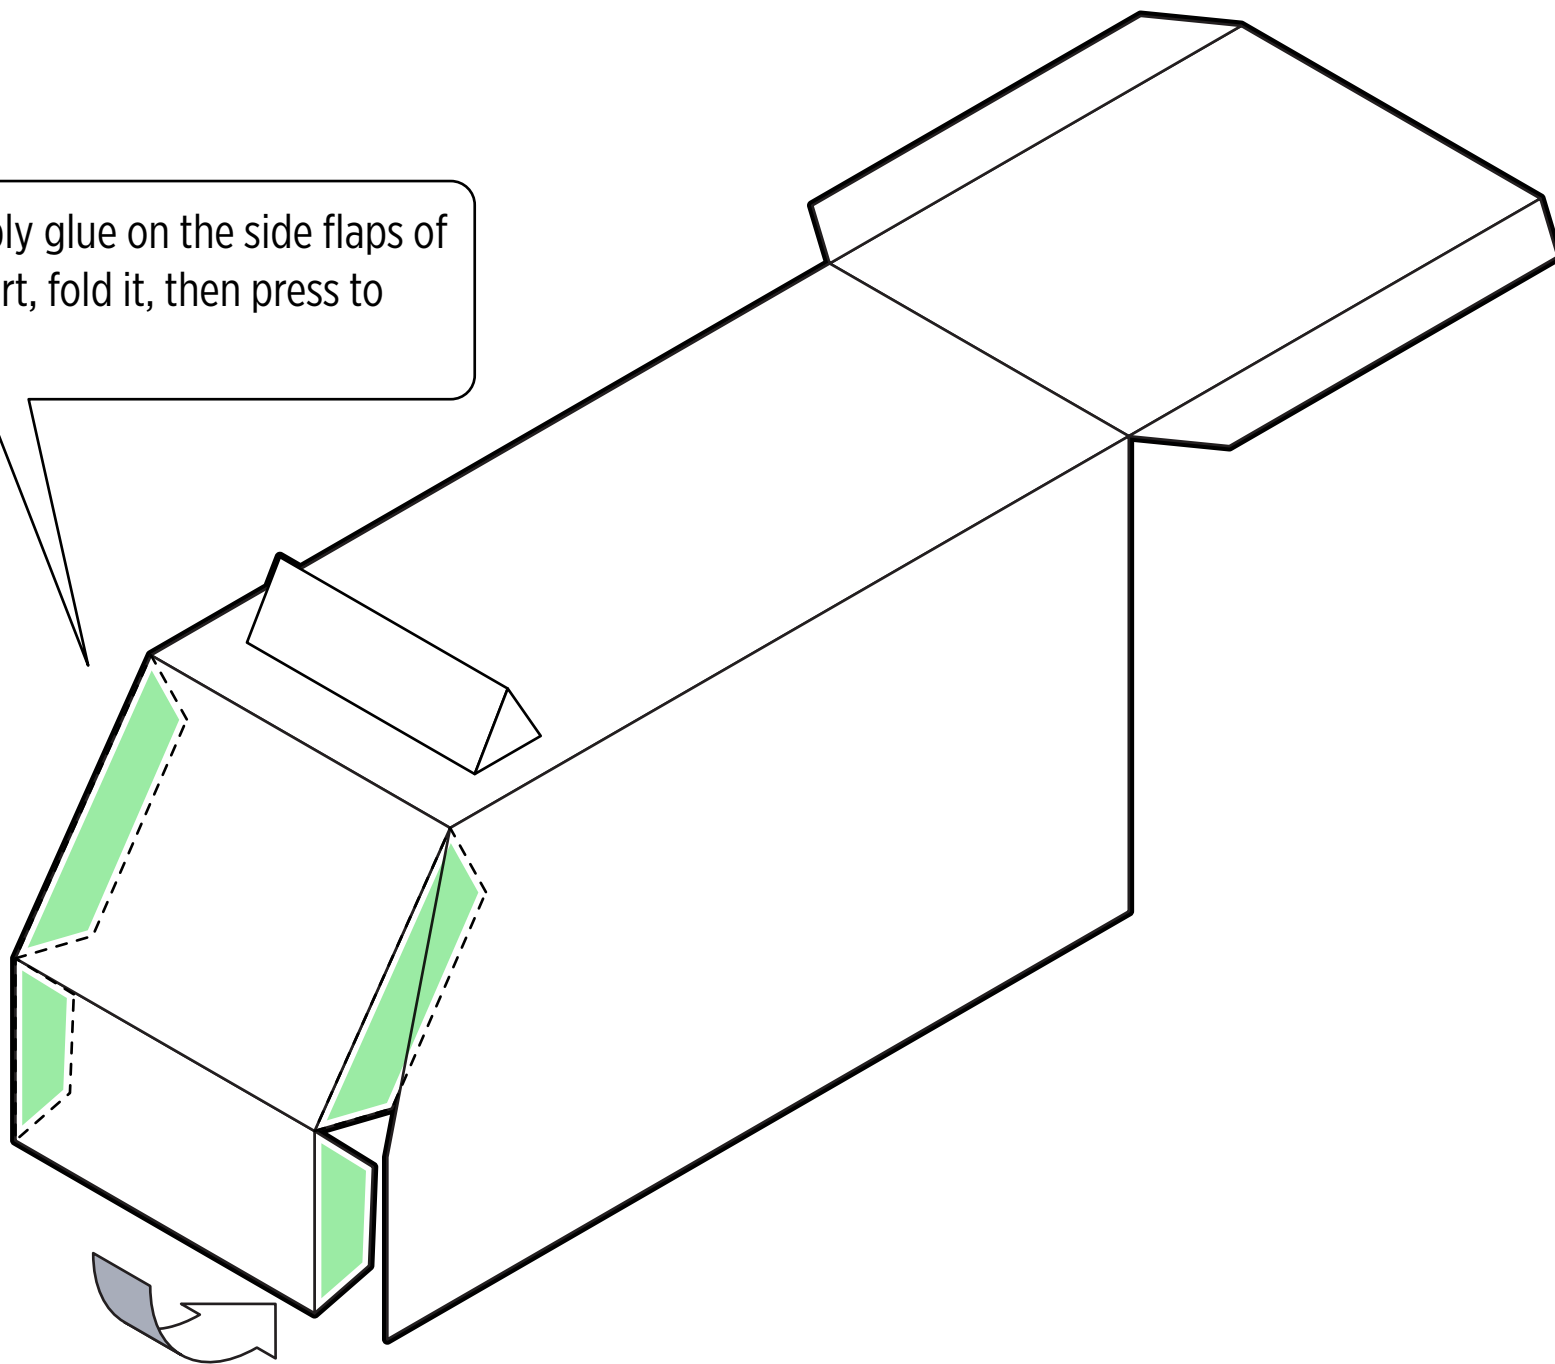

Step 3: Apply glue on one of the remaining flaps and fold inside

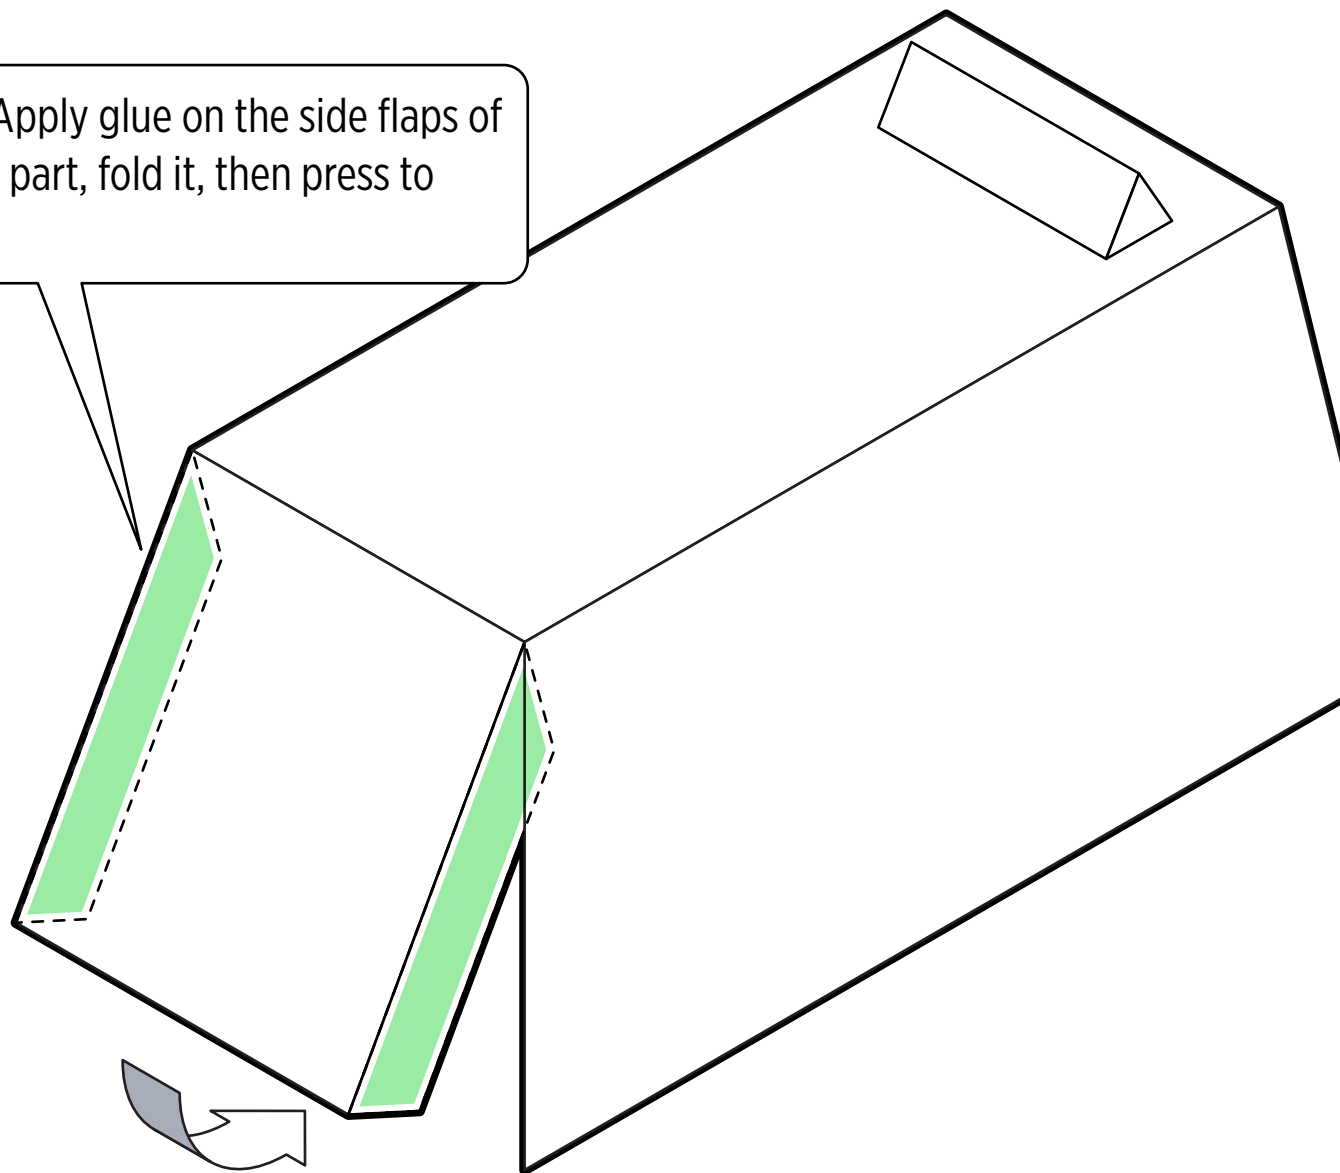

Step 4: Apply glue on the remaining flap, insert it into the cut on the top part of the Fire Engine, then press to stick.

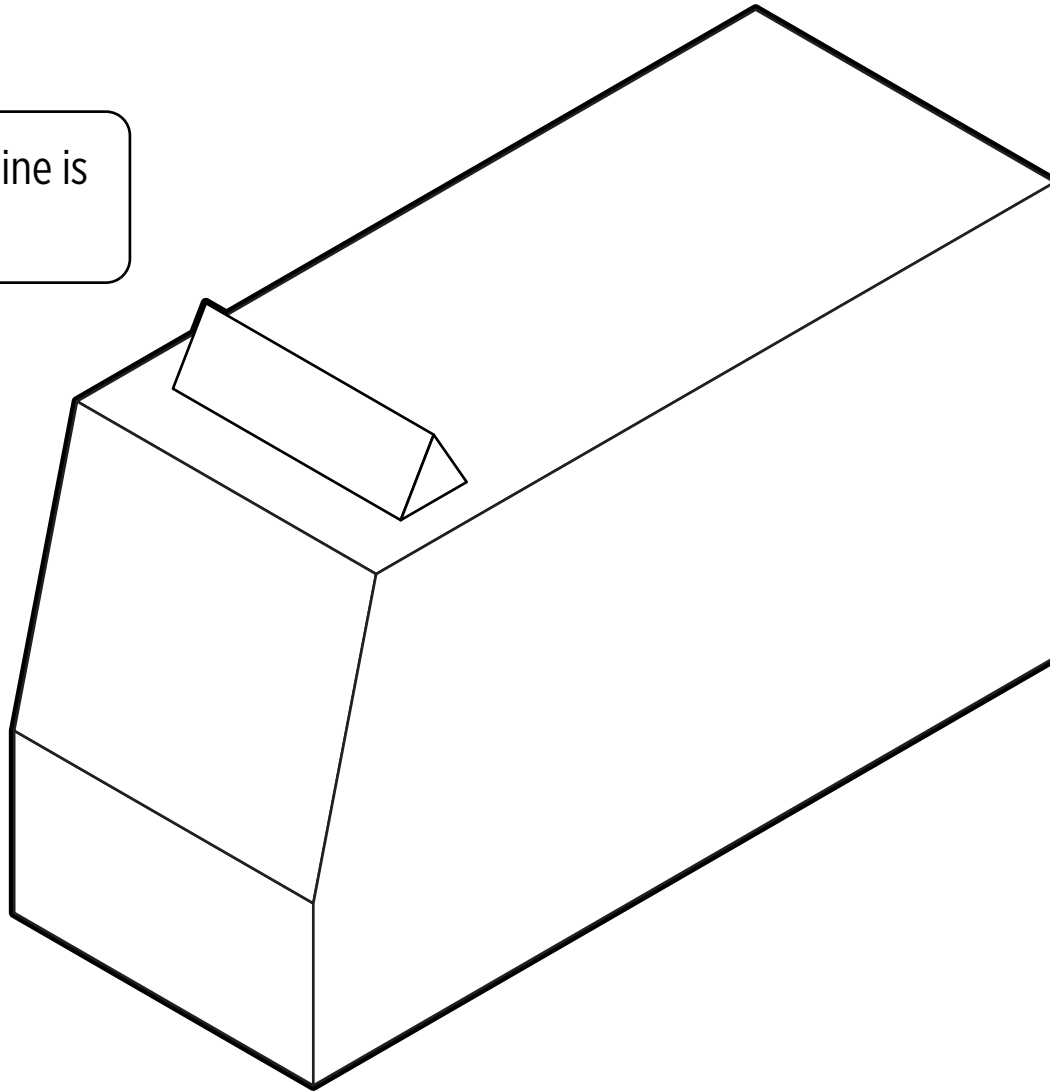

Step 5: Apply glue on the side flaps of the front part, fold it, then press to stick.

Step 6: Apply glue on the side flaps of the back part, fold it, then press to stick.

Step 7: The Fire Engine is ready!

SCHOOL BUS

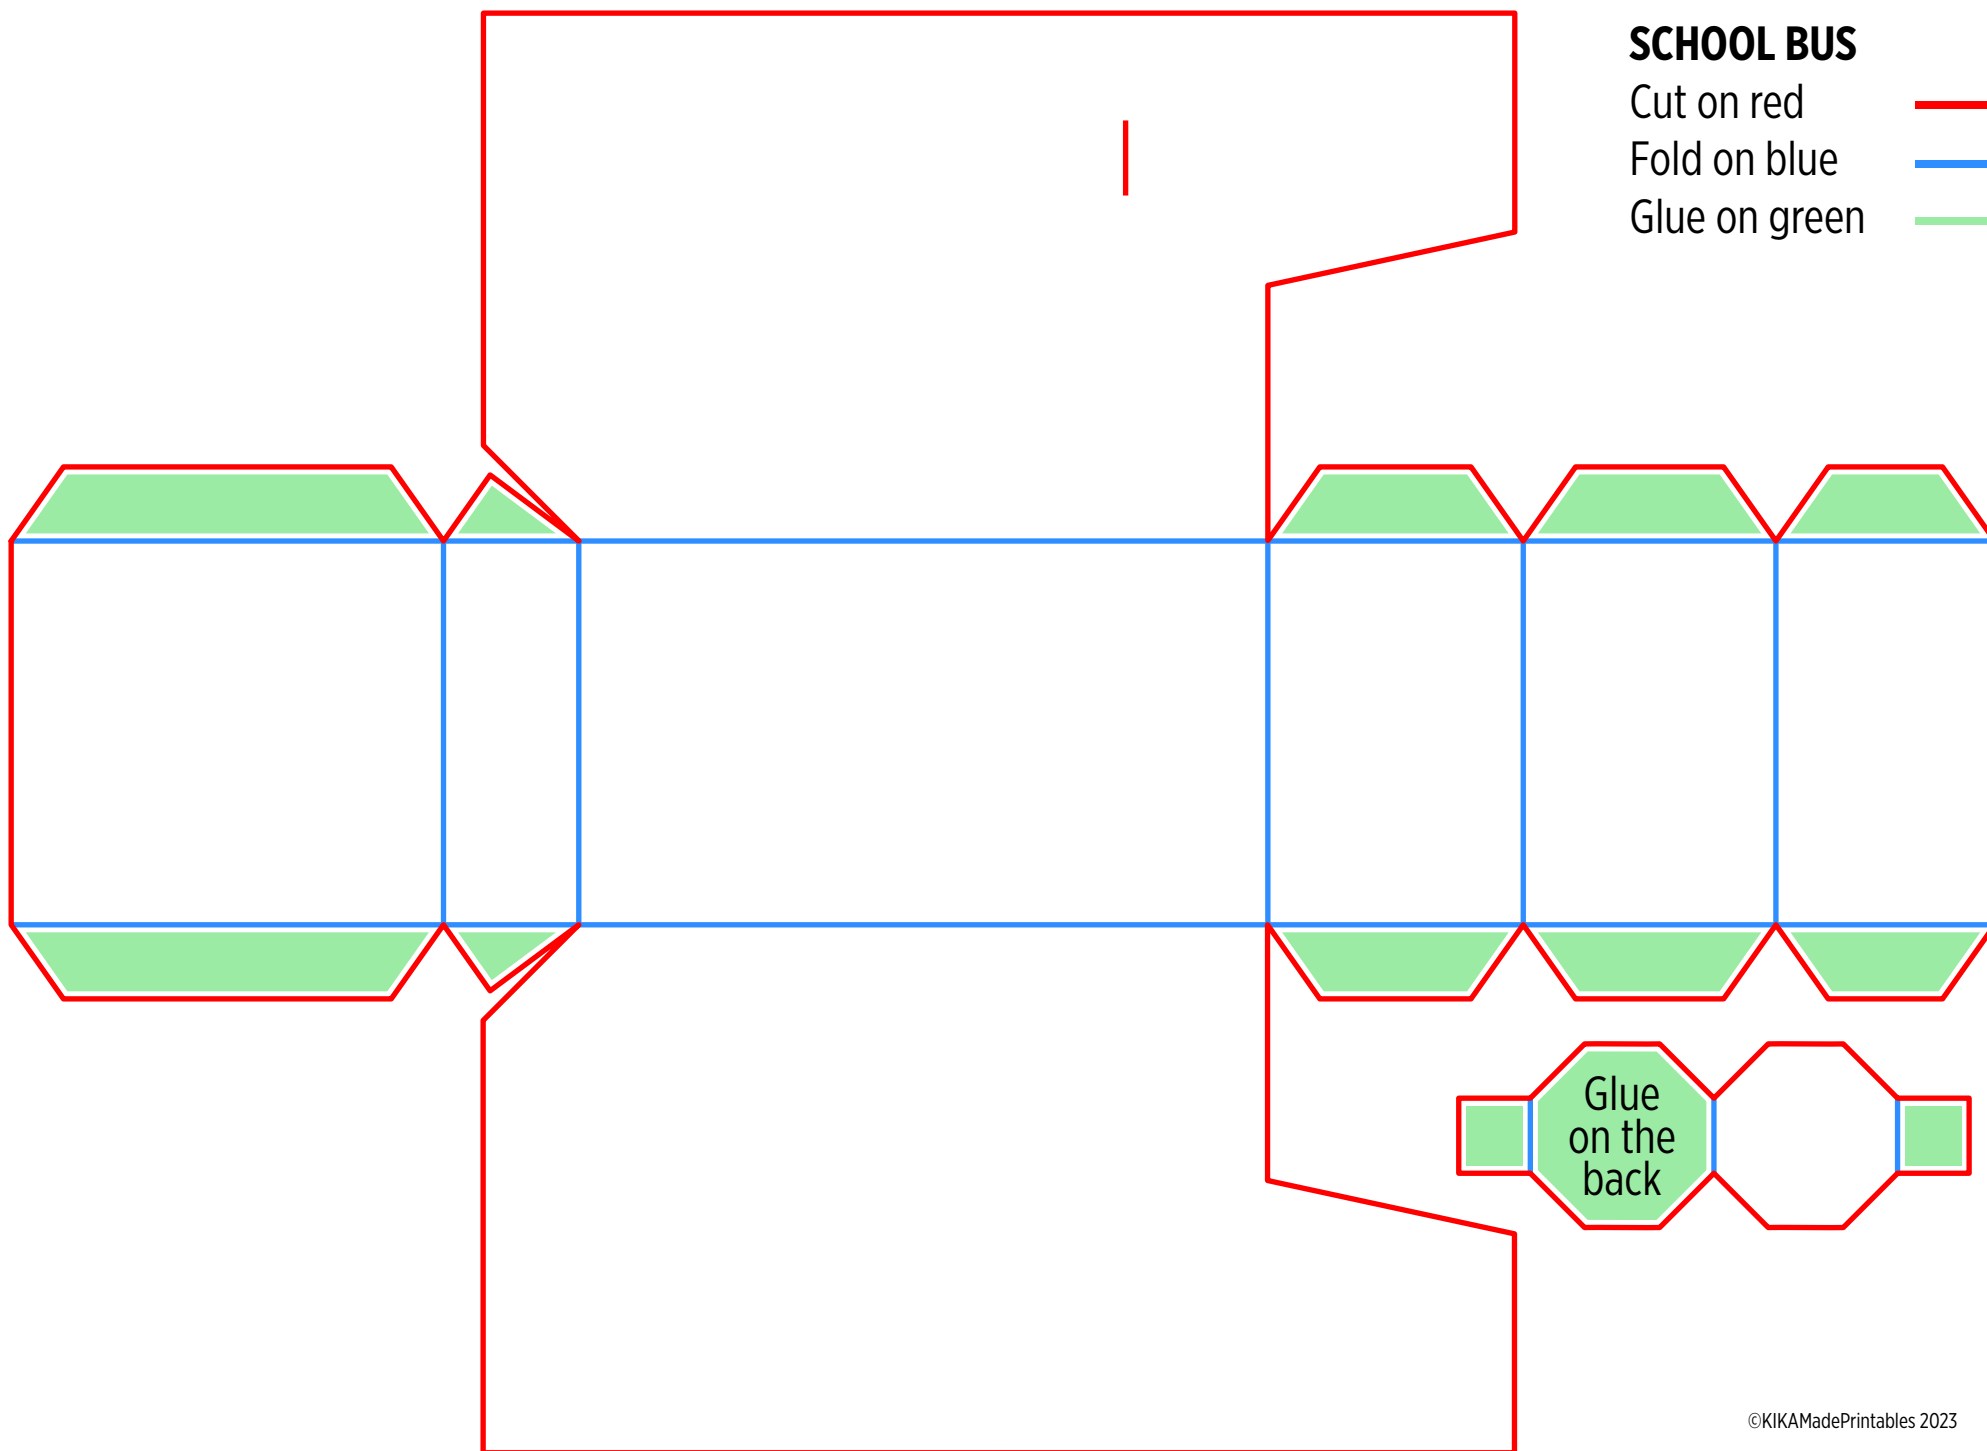

Cut on red

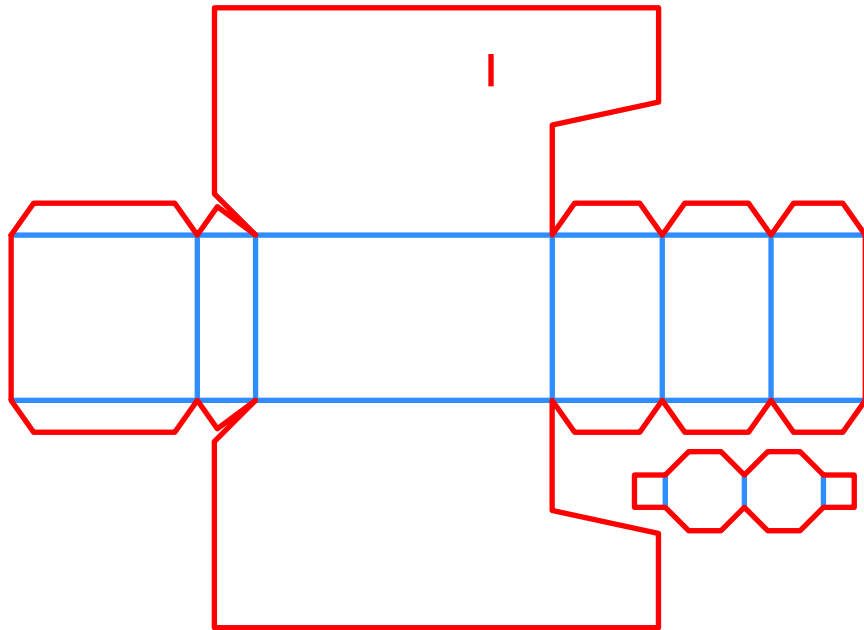

Fold on blue

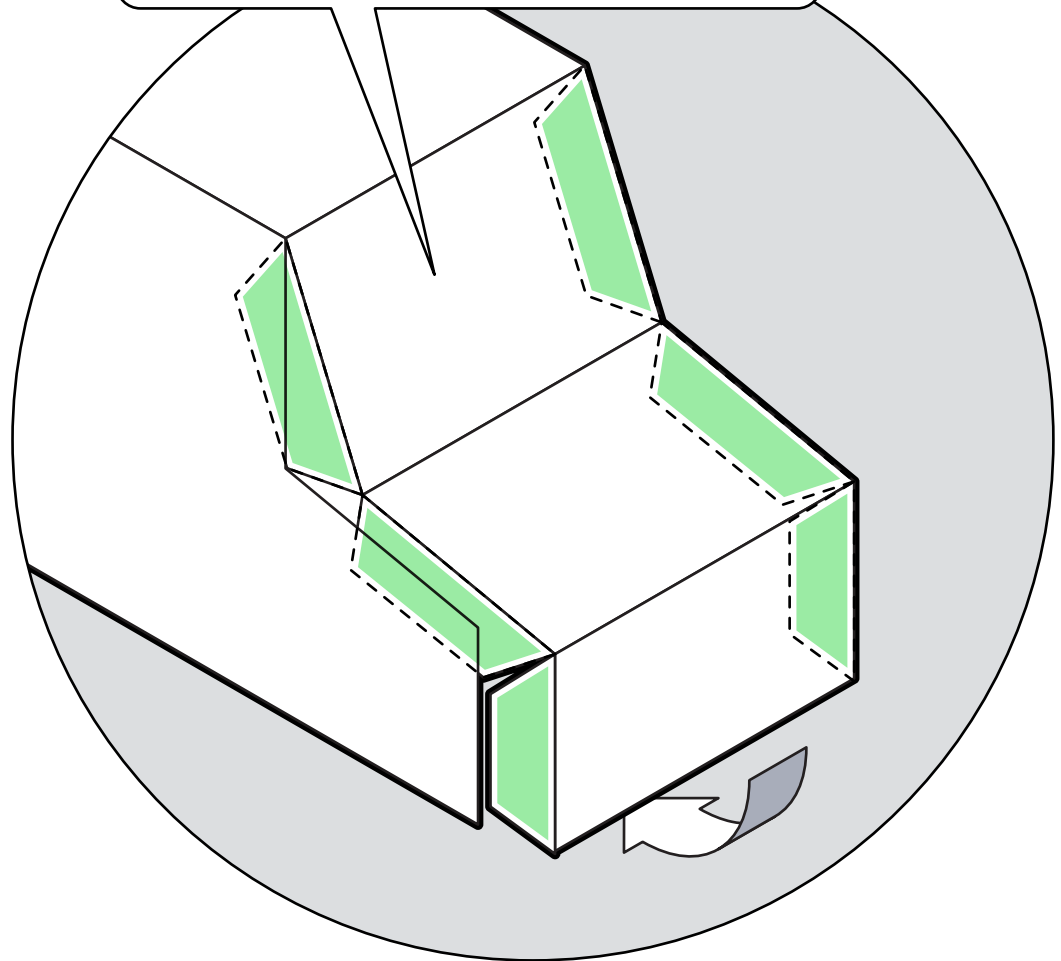

Glue on green

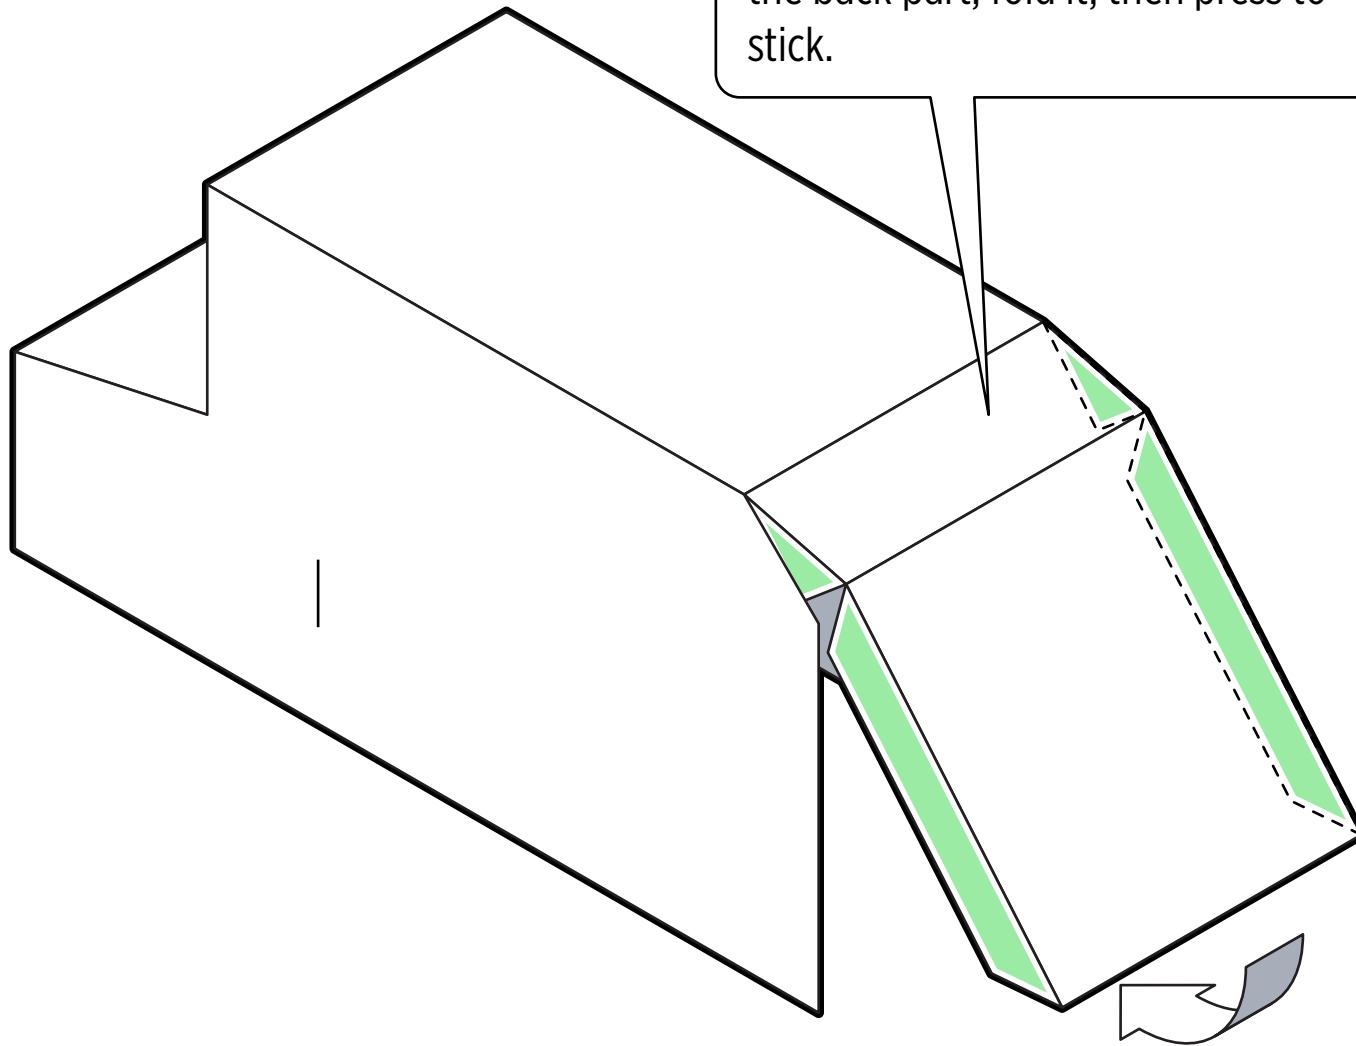

Step 1: Cut out the two component parts on the outer contour, marked in red in the diagram below, and fold along the lines marked in blue in the same diagram.

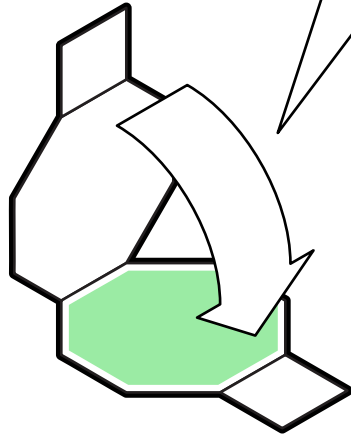

Step 2: Apply glue on the side flaps of the front part, fold it, then press to stick.

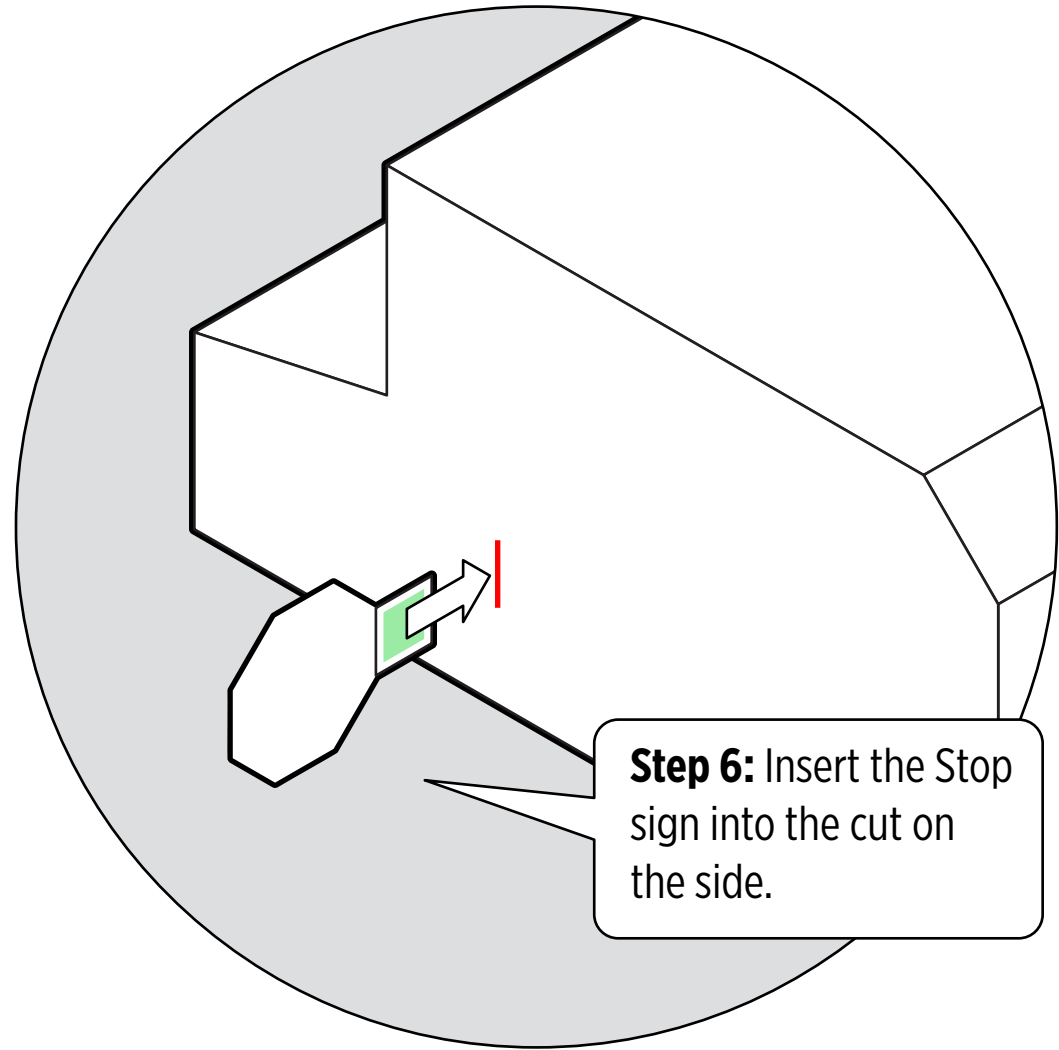

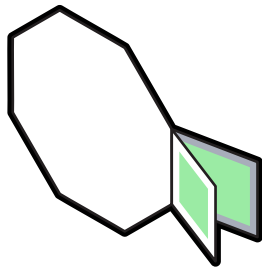

Step 3: Apply glue on the side flaps of the back part, fold it, then press to stick.

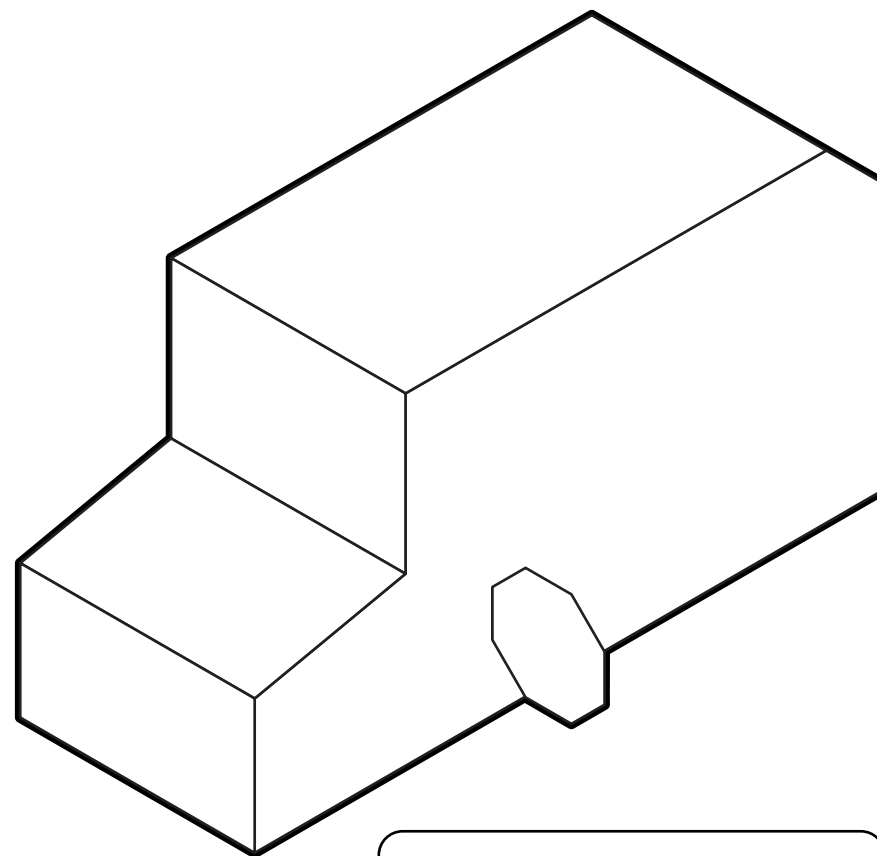

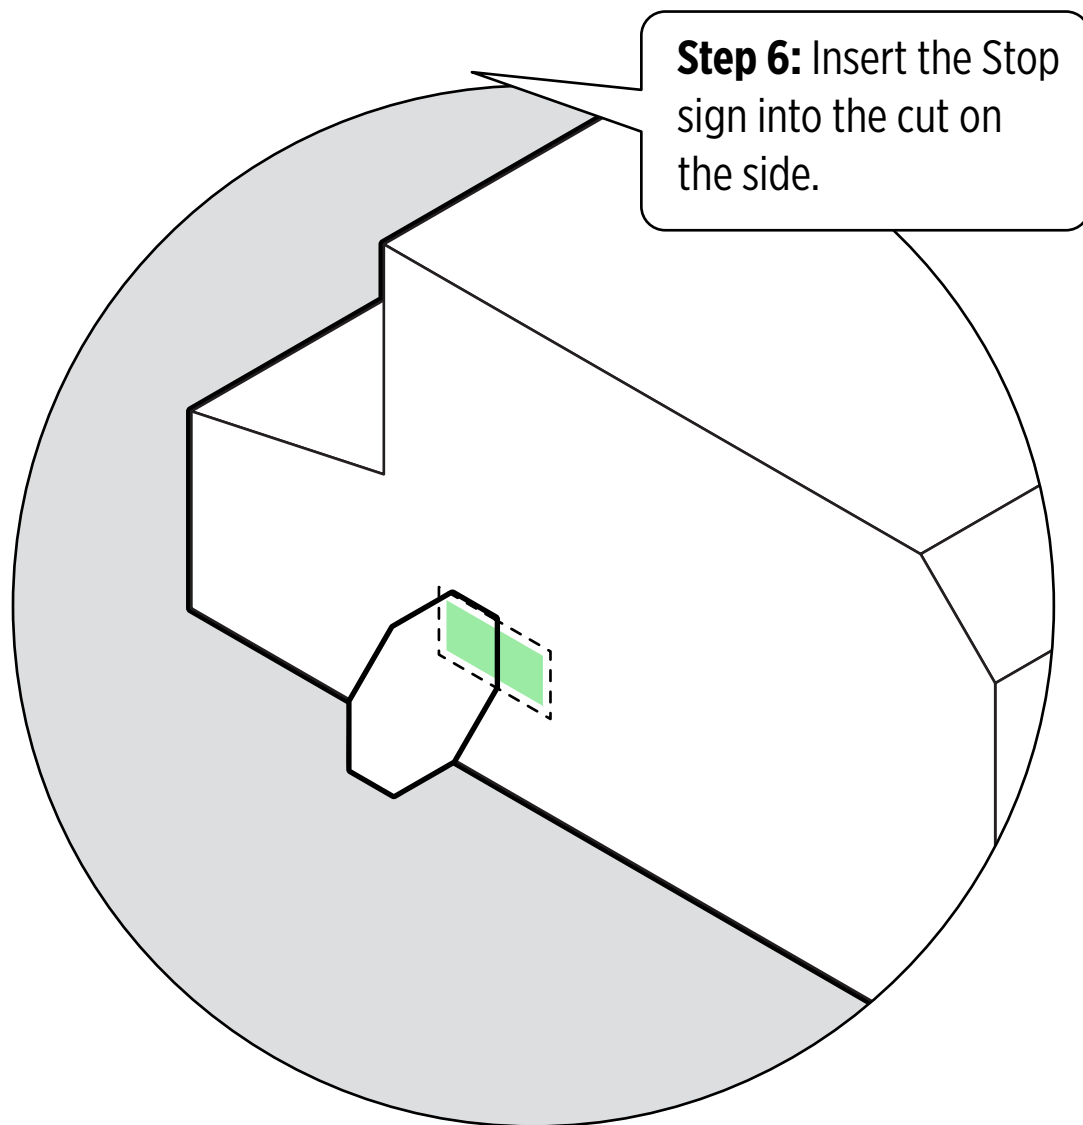

Step 4: Now assembly the Stop sign component. Apply glue inside, as in the diagram, fold, then press to stick.

Step 5: Apply glue on the flaps.

Step 6: Insert the Stop sign into the cut on the side.

Thank you!
